

# #15 Specification Felt General Information

#15 Specification Felt - ASTM D4869, Type II, D226, Type I

Atlas® provides a complete selection of roofing felts (or roofing paper). Roofing paper is an essential layer in the roofing process as it acts as extra protection from the elements. Felt roofing underlayment is asphalt saturated and are manufactured with a high-grade organic mat. #15 Specification Felt is a specification grade felt roofing underlayment used between the roof deck and the shingles.

## Features & Benefits

- Heavy Organic Mat
- High Asphalt Saturation
- Heavier Roll Weight
- Tightly Wound Rolls – Less Telescoping
- Consistent Roll Lengths
- Excellent Standard Packaging
- Highly Visible Alignment Lines
- High Tear Strength
- Easier Roll-Out – Less Sticking
- Flatter Installation Lay-Down With Less Curling
- Five Plants To Serve You Nationwide

### Product Specifications

Length: 144'

Width: 36"

Square Per Roll Coverage: 4

Square Feet Per Roll: 432
