

ENERGY STAR[®] RATED SHINGLES

PERFORMANCE. ENERGY EFFICIENCY. SAVINGS.

Administered by the Environmental Protection Agency, products bearing the ENERGY STAR[®] symbol have been independently certified to save money and protect the environment through exceptional energy efficiency.

Provides Cost Savings To Homeowners.

ENERGY STAR-rated products helped consumers save \$23 billion in energy costs in 2015. Additionally, some utility companies offer incentives for using ENERGY STAR-rated shingles.

Reduces The Need For Air Conditioning.

ENERGY STAR-rated products can reduce peak cooling demand by 10 to 15 percent. ENERGY STAR-rated shingles reflect more of the sun's rays, decreasing the amount of heat transferred into a home and reducing the need for air conditioning.

Extends Roof Service Life.

ENERGY STAR-rated shingles help decrease roof temperatures, which may extend the service life of a roof, ensuring it protects your home longer by standing the test of time.
