CLEAN IS BUILT INTO EVERY ROOF STORMMASTER® SHAKE

HIGH WIND AND IMPACT RESISTANT SHINGLE

Featuring

StormMaster® Shingles are manufactured using the latest in algae resistance technology, so you will never need to worry about streaking again – ever. StormMaster® Shake featuring Scotchgard™ Protector Shingles are the best assurance of built-in, long-term algae and stain resistance. The shingle color you choose is the color you'll keep.

The Science of Algae Prevention

Copper stops algae. Copper-fortified granules are uniformly distributed across the surface of StormMaster® Shake featuring Scotchgard™ Protector Shingles. Independent third-party laboratory tests ensure optimal and consistent copper content, resulting in an algae resistant shingle qualified to earn the Scotchgard™ name. These shingles contain a preservative to inhibit discoloration by algae – which only applies to the shingle.

Lifetime* Algae Resistance Limited Warranty

In order to qualify for the Lifetime Algae Resistance Limited Warranty, installation must include Pro-Cut® Hip & Ridge featuring Scotchgard™ Protector with Atlas Pristine shingles featuring Scotchgard™ Protector.

Typical Algae Stained Roof

When black algae streaks take over, not only does it look terrible and make your house appear old and dirty, but also reduces the curb appeal and value of your home.

Look around at the roofs in your neighborhood. See anything like this? Since algae spores are carried by the wind, even if you don't have this problem now, you soon could.

Algae Streaking is a problem almost everywhere in the U.S. – Except on an Atlas Roof featuring Scotchgard™ Protector.

TOUGH IS BUILT INTO EVERY SHINGLE

StormMaster® Shake is manufactured incorporating a rubberized SBS polymer that helps create a more durable and longer lasting shingle that provides protection in extreme weather conditions.

Ask your insurance agent about discounts on your homeowners insurance when you install StormMaster® Shake featuring Scotchgard™ Protector.

WHAT MAKES STORMMASTER® SHAKE SUCH A GREAT CHOICE?

Manufactured Using SBS

All weather application and superior wind resistance.

Class 4 Impact Resistance
