-EXTINGUISHING MEDIA:

Carbon dioxide – Dry Chemical – Foam – Water(recommended)

-SPECIAL FIREFIGHTING PROCEEDURES:

Wear self-contained breathing apparatus (SCBA) in positive pressure mode. Personnel not having suitable respiratory protection must leave the area to prevent significant exposure to combustion gases from any source. In enclosed or poorly ventilated areas, wear SCBA during cleanup immediately after a fire as well as during the attack phase of fire fighting operations.

-UNUSUAL FIRE AND EXPLOSION HAZARDS:

Combustion of TPO Products liberates carbon monoxide, carbon dioxide, various and partially oxidized hydrocarbons.

Section V - HEALTH HAZARD DATA

-PERMISSIBLE EXPOSURE LEVEL:

N/A

-EFFECTS OF OVEREXPOSURE:

Breathing: At processing temperatures, TPO may release vapors which can be mildly irritating to some persons. This can be controlled by proper ventilation.

Skin: Thermal burns will occur if molten compound comes in contact with unprotected skin.

-FIRST AID:

Skin: Treat burns the same as any other thermal burn.

Breathing: Move affected person to fresh air. If breathing is difficult, administer oxygen. Get medical attention if difficulty persists.

Section VIII - SPECIAL PROTECTION INFORMATION

-RESPIRATORY PROTECTION:

With adequate ventilation consistent with good industrial workplace practices, there should be no need to use a respirator during normal processing of TPO; however, if air monitoring results show concentrations exceeding those limits listed for chemicals in Section II, wear a NIOSH/MSHA-approved respirator specific for those chemicals. Comply with OSHA 1910.134 (29 CFR)

-VENTILATION:

Provide sufficient mechanical (general and/or local exhaust) ventilation to afford good air-exchange in the work place consistent with good industrial hygiene practices.
