

Universal Dowel Sleeve System

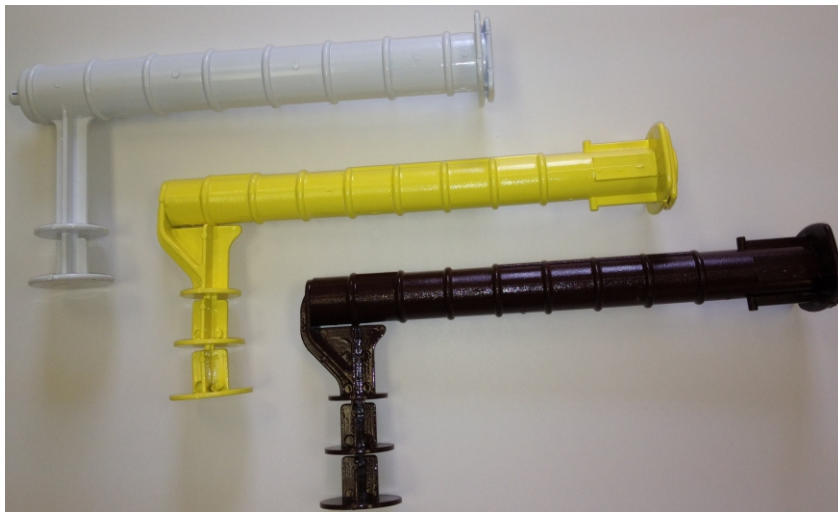

Features & Benefits

- * Full length sleeve ensures no concrete to dowel bonding
- * Injection moulded for accurate tolerances and maximum straightness
- * Stiffening ribs to minimize distortion
- * Simply twist & turn in knock-outs in BoMetals QuicKey System
- * Can be used as a face fixing sleeve on conventional timber or steel formwork
- * Can be used as part of a dowel cradle or basket
- * Length can be trimmed to suit any dowel length under 8.5"
- * Support leg/stand allows extra support ensure correct alignment is maintained during pour
- * All UDS's have legs stands that can easily snapped off for height adjustment
