

Learn more about this **innovative technology**, available now at Bostik.

GET HEATED FLOORS IN 48 HOURS* WITH BOSTIK'S BAM™!

BAM™ by Bostik is the industry's first and only mortar with a 48-hour turnaround for heated floor use. This high-performance, fiber-reinforced large and heavy tile mortar is **ready to grout in 4 hours**, offers **astounding bond strength**, and is great to use over uncoupling membranes and sheet membranes—making BAM™ the best choice for getting **your heated flooring system turned on faster!**

Grout with Hydroment® Vivid™, a rapid-curing, premium-grade cementitious grout that offers color-consistent technology with enhanced stain and efflorescence protection. It exceeds ANSI 118.7 requirements and contains Bostik's Blockade® Antimicrobial Protection. **Block the cold this season with BAM™ and Vivid™, the unbeatable duo from Bostik.**

BAM™ CONTAINS RAPIDCURE® TECHNOLOGY—READY TO GROUT IN 4 HOURS

BAM™ HAS 30-MINUTE OPEN TIME AND ADJUSTABILITY

BAM™ EXCEEDS ANSI 118.15

* When turning on your radiant heated flooring system for the first time each season, increase the temperature at increments of no more than +10° each day starting from room temperature until the heat/wire system is at full operating temperature. "Thermal shocking" or shocking an installation by turning the system to full heat too quickly is not advised. Follow the Tile Council of North America Handbook guidelines for all tile installation methods.

Read and understand all technical and safety data sheets completely before beginning installation.
