

May 18, 2012

Dear Bostik Customer:

Congratulations for your forward thinking and the environmentally conscious design of your current construction project. Bostik is pleased to be a U.S. Green Building Council member and a major proponent of the LEED initiative in the construction materials industry.

Bostik is a leader in the adhesive, sealant and coatings segment of the construction market with one of the most comprehensive product offerings available, all backed by strong system warranties. Bostik is the 4th largest adhesive and sealant company in the world. The greatest advantage of utilizing all of our products for your construction sealants/adhesives is that you have only one manufacturer to deal with if questions or concerns arise. Additionally, we have a dedicated sales and technical service organization that is at your service any time you need assistance.

Attached is a list of Bostik construction products that may contribute to the qualifications of a project for LEED-NC V2.2 certification under the following Indoor Environmental Quality credits for low emitting materials: EQ 4.1 Adhesives & Sealants. (An extract of these standards is attached for your review.) The intent of these one-point credits is to reduce the quantity of indoor air contaminants that are odorous, potentially irritating and/or harmful to the comfort and well-being of installers and occupants.

If you have any questions regarding our product offering, please contact Bostik directly at 800-726-7845. Once again, we look forward to working with you on this exciting project.

Regards,
Thomas F. Mylott
