Smart Options, One Complete System

Waterproofing and Moisture Mitigation

Protecting your floors from subfloor moisture is essential to help protect the space from mold, mildew, and other water-related issues that could damage the finished flooring and compromise its integrity. Bostik's innovative technology in our waterproofing and moisture mitigation products will help ensure a healthy, strong floor through the years.

Primers

Never neglect a good primer in your surface preparation installation. Whether prepping the subfloor for patching or prepping for finished flooring, a primer reduces surface tension, reduces the risk of surface imperfections, and even adds bond strength for the adhesive you plan to use.

Repair Patching, Ramping, and Screeding

From trowelable floor leveling to building curbs and ramps, from featheredging to filling holes 5" deep, Bostik's line of patches and ramping compounds help prep your concrete, wood and masonry substrates prior to leveling and floor installation.

Self-Leveling Underlayments

Our innovative self-leveling underlayments are designed to save you valuable time and money. With low dust, low odor, and walk-on times as short as two hours, Bostik products are the smart choice for your subfloor preparation needs.

Bostik's Roll-Cote™ barrier coating and primer: The Smart Choice in Surface Preparation

Roll-Cote™ is making waves in the industry as a high-performing moisture mitigator and primer all in one! Roll-Cote™ is one component with no mixing required, and its easy-to-apply formulation and fast dry time make Roll-Cote™ dependable and user-friendly. Roll-Cote™ is extremely durable, has low odor, and the black color provides a great visual indication of coverage during the installation process.
