The colors shown are approximate representations only and Brickform does not guarantee that the final color will be an exact match. Application methods, jobsite conditions, texturing or finishing techniques such as brooming or troweling, the use of sealers, and slight color-drifts in raw materials are likely to produce variations of the colors. **The sample chips represented on this color chart were produced to compare to concrete with a flat troweled finish, sealed with BRICKFORM solvent-based sealer.**

*Brickform Overlay Colorants not available in Smokey Blue and Pool Blue
NOTE: Tinta Seal and Refresh Color Packs are Made to Order only

Defining Decorative Concrete Since 1971

BRICKFORM.COM

Prior to using Brickform products, refer to the current TIS and SDS available at brickform.com or by using the QR codes below.

Color Hardener

Color Hardener is manufactured with the finest UV-resistant pigments and premium aggregates available. When properly applied and troweled into newly placed, fresh concrete, it forms a colored concrete surface that is resistant to weathering, wear, and normal abrasion.

- 90 to 120 ft² per 60 lb. bucket
- Improves abrasion resistance
- Hardens the concrete surface

Antique Release

Antique Release is a hydrophobic powder that imparts color while serving as a bond breaker for stamping. It is made from a finely ground formula that creates beautifully antiqued concrete surfaces. During the stamping process, Antique Release is pressed into the concrete surface, creating a secondary coloring effect once washed off and sealed.

- 800 to 1000 ft² per 30 lb. bucket
- Bond breaker and Antiquing agent
- Fade-resistant

Antique-It

Antique-It is a water-soluble antiquing agent designed to impart a secondary color or to highlight stamped concrete or textured overlays. Antique-It is easy to apply, dries fast, and provides a durable color that closely resembles the look of antique release powder. Use Antique-It on newly placed hardened concrete or to rejuvenate old unsealed stamped concrete.

- 2000 to 3000 ft² per 3 lb. container
- Unlimited effects and color combinations
- Dust free application

Overlay Colorants

The Overlay Colorants are pre-measured bottles of Liquid Integral Colorants designed to add color to the base cement of SM Professional Grade, SM Pro PLUS, Cem-Coat Plus and Stampable Overlay (SC-60, White Mix).

- 10 oz bottles
- Use 1 bottle per bag of Overlay
- 6 per case

* Brickform Overlay Colorants not available in Smokey Blue and Pool Blue

Tinta' Seal

Enhance and correct color with Tinta' Seal. Tinta' Seal mixes with Brickform solvent-based sealers to add a opaque color to integrally colored, stamped, and overlaid concrete surfaces. Each 16-ounce tint pack conveniently mixes in a 5-gallon pail of solvent-based sealer to create a tinted sealer.

- 16 oz. bottle
- 1 bottle per 5 gal. of sealer
- Color matching available
- Compatible with Gem-Seal, Poly-Seal, and Gem Cure & Seal
- Not recommended for use with Gem-Guard SB
- **Made to Order Only**

Refresh

Brickform Refresh is a solvent-based, semi-opaque stain used to impart color on unsealed, porous concrete and masonry surfaces. Refresh is great for correcting surface discoloration, upgrading existing concrete, or blending together multiple pours of integrally colored concrete. For added protection and color enhancement, Refresh can be sealed using spray-applied Brickform Gem-Seal or Poly-Seal.

- 1000-1500 ft² per 5 gal pail
- UV resistant
- Apply with acetone resistant sprayer
- **Made to Order Only**
