

The image shows a blue Porsche Carrera GT and a red sports car parked on a highly reflective, polished floor. The floor's surface is a warm, brownish-gold color, and it clearly reflects the cars and the overhead lights. The blue car is in the foreground, angled towards the left, while the red car is partially visible on the far left. The background is a solid dark blue.

Product Description: Pro-Dye Plus penetrates the surface of concrete, creating a translucent color that dries quickly and will not chip, crack, or peel. Pro-Dye Plus is packaged in liquid form to be mixed in proportion with acetone, alcohol or water. Pro-Dye Plus designed to work with the Lythic Polishing System for the coloring process in polishing floors and can also be used to touch-up floors stained with Brickform Blush-Tone Acid Stain.

Prior to using Pro-Dye, refer to the current TIS and SDS available at www.brickform.com or by using the QR code.
