CCW Protection Board-HS

Description

CCW Protection Board-HS is a heavy-duty modified bitumen protection board consisting of a medium-weight fiberglass mat with a high-quality SBS (Styrene-Butadiene-Styrene) rubber and asphalt blend. This elastomeric asphaltic blend lends elasticity and flexibility to the sheet. The inorganic fiberglass reinforcement provides high tensile strength, dimensional stability and tear resistance.

CCW Protection Board-HS is designed to be installed as a protection course in the CCW-500R System and is used to protect the membrane from damage caused by foot traffic and physical abuse from other trades.

Typical uses include plaza decks, inverted roofing systems, parking decks with asphalt overlayers and other horizontal surfaces to which waterproofing membranes have been applied.

Installation

Embed in hot, liquid CCW-500 and over lap 2-3". Seal all laps with CCW-500.

Storage

Store so as to prevent damage to the bundle. Avoid prolonged exposure to direct sunlight. Protect from extreme environmental conditions. Store away from open flames or welding areas.
