Sedum 'Autumn Joy'

Property	Description
Common Name	Stonecrop
Height	24 inches
Width	24 inches
Bloom Time	Late Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. 'Autumn Joy' ('Herbstfreude') is an upright cultivar, with grayish-green fleshy leaves and large domes of bright pink flowers which gradually soften to a coppery-pale pink through winter.

Sedum 'Frosty Morn'

Property	Description
Common Name	Stonecrop
Height	24 inches
Width	18 inches
Bloom Time	Summer through Fall
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy Loam
Moisture	Moist

This recent introduction from Japan is similar in habit to "Autumn Joy," but its foliage is variegated, each fleshy leaf edged in white. And the flowers, which open in late summer, are pale pink, maturing white. Stonecrops are a large family of more than 600 species of succulents, very easily grown in quick-draining soils and sunny spots. The foliage is fleshy, and plants prefer well-drained soils and full sun. In the South, a number of rock garden species are at their finest during the cool fall, winter, and spring months and barely hang on during the summer. Partial shade is beneficial south of Zone 6. All tolerate drought and require little maintenance. Stonecrops are succulents that vary greatly in size and habit, from 2' border plants to prostrate ground covers. All prefer full sun and well-drained soil.

ROOF GARDEN

CCW Sedum Plants

Sedum 'Matrona'

Property	Description
Common Name	Stonecrop
Height	24 inches
Width	18 inches
Bloom Time	Late Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

'Matrona' produces strong, shiny red stems that hold large, pale pink flower heads that last well into the fall season.

Sedum 'Vera Jameson'

Property	Description
Common Name	Stonecrop
Height	24 inches
Width	18 inches
Bloom Time	Late Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. 'Vera Jameson' is an upright branching variety, with blue-green fleshy leaves taking on a handsome red cast in the cool weather of fall.

Sedum acre 'Gold Moss'

Property	Description
Common Name	Goldmoss Stonecrop
Height	6 inches
Width	18 inches
Bloom Time	Late Spring
Flower Color	Yellow
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. 'Gold Moss' is a dense, carpet-forming variety, with bright green, needle-like fleshy leaves in tight clusters. Roots easily; can be invasive.

Sedum alboroseum a. 'Medio Variegata'

Property	Description
Common Name	Variegated Sedum
Height	6 inches
Width	18 inches
Bloom Time	Summer through Fall
Flower Color	Cream
Hardiness Zone	3a
Light	Full or Part Sun
Soil	Sandy
Moisture	Dry

Flower clusters are greenish-white with a touch of pink. Blooms August–October. Similar to 'Autumn Joy' but has a creamy-white blotch in the center of the leaf.

Sedum album 'Coral Carpet'

Property	Description
Common Name	Stonecrop
Height	6 inches
Width	18 inches
Bloom Time	Late Spring
Flower Color	White
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. 'Coral Carpet' is a low mounding variety, with dense mounds of fleshy, bright green leaves in tight little rosettes trailing from short red stems. Roots easily; can be invasive.

Sedum album 'Murale'

Property	Description
Common Name	Stonecrop
Height	4 inches
Width	12 inches
Bloom Time	Late Spring
Flower Color	White
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy
Moisture	Dry to Moist

A very attractive sedum in both summer and winter. Evergreen foliage is bright green in summer and turns reddish-orange in winter. An excellent plant for rock gardens, ledges, and container plantings.

Sedum cauciculum

Property	Description
Common Name	Stonecrop
Height	3 inches
Width	12 inches
Bloom Time	Mid Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy
Moisture	Dry to Moist

This plant has low growing and slow spreading scalloped blue-gray leaves that are edged in pink. The pink flowers age to red in mid to late summer to add even more interest to the already attractive foliage. Plant this in groups in the rock garden or on the border for an attractive accent.

Sedum cauciculum 'Bertram Anderson'

Property	Description
Common Name	Stonecrop
Height	6 inches
Width	24 inches
Bloom Time	Summer through Fall
Flower Color	Purple
Hardiness Zone	3a
Light	Full Sun
Soil	Sandy
Moisture	Dry to Moist

Forms a low-growing mat of trailing, deep burgundy-black foliage set with purple-red blooms in mid-to-late summer. This is an older variety but still outstanding as edging, in containers or the rock garden. Grow it with some Sedum Angelina for a dramatic, drought-tolerant combination.

Sedum divergens

Property	Description
Common Name	Pacific Stonecrop
Height	3 inches
Width	10 inches
Bloom Time	Summer through Fall
Flower Color	Yellow
Hardiness Zone	5a
Light	Full or Part Sun
Soil	Sandy
Moisture	Dry to Moist

These succulent groundcovers have abundant stems of star-shaped flowers. Very useful in the rock garden, tolerating dry ground in partial shade. This compact species is prevalent in the Columbia River Gorge. Rounded leaves on short, upright stems are like jade-green bubble-alga, maroon-red in winter. Bright yellow flowers in summer.

Sedum hispanicum 'Purple Form'

Property	Description
Common Name	Blue Carpet Stonecrop
Height	3 inches
Width	12 inches
Bloom Time	Late Summer
Flower Color	Pink
Hardiness Zone	3a
Light	Full or Part Sun
Soil	Sandy
Moisture	Dry

Blue-gray foliage in summer then changing to deep blue and lovely hues of purple in colder weather. In late summer, foliage is completely covered with small pink star-shaped flowers. Extremely heat drought tolerant. A good plant for walkways, rock gardens and container plantings.

Sedum hybridum ‘Immergrunchen’

Property	Description
Common Name	Stonecrop
Height	3 inches
Width	12 inches
Bloom Time	Mid Summer
Flower Color	Yellow
Hardiness Zone	5a
Light	Full Sun
Soil	Sandy
Moisture	Dry to Moist

Light-green foliage with yellow flowers on a compact low growing plant.

Sedum kamtschaticum

Property	Description
Common Name	Stonecrop
Height	8 inches
Width	15 inches
Bloom Time	Early Summer
Flower Color	Yellow
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. Kamtschaticum is a dense, mounding variety, with rich green, fleshy leaves in handsome rosettes. Roots easily; can be invasive.

Sedum kamschaticum 'Weihenstephaner Gold'

Property	Description
Common Name	Stonecrop
Height	6 inches
Width	18 inches
Bloom Time	Late Spring
Flower Color	Gold
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. 'WeihenstephanerGold' is a dense, mounding variety, with pale green, serrated leaves in handsome rosettes which take on a bronze cast in fall. Roots easily; can be invasive.

Sedum kamschaticum k. variegatum

Property	Description
Common Name	Striped Kamtschatka Stonecrop
Height	6 inches
Width	18 inches
Bloom Time	Mid Summer
Flower Color	Yellow
Hardiness Zone	5a
Light	Full or Part Sun
Soil	Sandy
Moisture	Dry

This clumping form of *S. kamschaticum* emerges in early spring with dozens of grass-green rosettes held horizontally on the end of 6" long stems. As the temperatures warm, the edges of the leaf take on a nice creamy gold border. The clumps are topped with sprays of bright yellow flowers held just above the foliage in midsummer.

Sedum reflexum 'Blue Spruce'

Property	Description
Common Name	Stonecrop
Height	6 inches
Width	16 inches
Bloom Time	Late Spring
Flower Color	Yellow
Hardiness Zone	7a
Light	Full Sun
Soil	Sandy
Moisture	Dry

Mats of blue-green pine like foilage creep along the ground. Great at the front of borders to add contrast and a must have for rock gardens. It is semi-evergreen in Zones 6 and warmer. Flowering late spring and summer.

Sedum sediforme

Property	Description
Common Name	Stringy Sedum
Height	20 inches
Width	20 inches
Bloom Time	Summer through Fall
Flower Color	White
Hardiness Zone	7a
Light	Full or Part Sun
Soil	Sandy
Moisture	Moist

Hardy. Evergreen. Upright stems with glaucous blue-green succulent foliage grow to about 10" (25 cm) tall. Flower stalks can grow as high as 20" (50 cm) tall and are topped whitish flowers.

Sedum spectabilis 'Brilliant'

Property	Description
Common Name	Stonecrop
Height	18 inches
Width	18 inches
Bloom Time	Late Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy
Moisture	Dry to Moist

Large, flat-topped clusters of brilliant-pink flowers top attractive, chartreuse, fleshy leaves. Blooms in late summer and early autumn.

Sedum spurium 'John Creech'

Property	Description
Common Name	Stonecrop
Height	2 inches
Width	16 inches
Bloom Time	Early Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy
Moisture	Dry

The small scalloped green leaves of this weed-smothering groundcover are topped with pink flowers in fall.

Sedum spurium 'Red Carpet'

Property	Description
Common Name	Stonecrop
Height	4 inches
Width	24 inches
Bloom Time	Mid Summer
Flower Color	Red
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy
Moisture	Dry

Sedum Red Carpet is a wonderful ground cover that is a little different from the rest. With a height of 3–4" and a spread of 24", it's red blossoms flower from May to September. The foliage is a dark red with green and produces a wonderful fall color. Sedum Red Carpet needs to be planted in full sun in well-drained soil. It will tolerate most soil types, and is drought resistant. A great choice for beds and borders and excellent as cut flowers.

Sedum spurium 'Tricolor'

Property	Description
Common Name	Stonecrop
Height	4 inches
Width	18 inches
Bloom Time	Early Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full Sun
Soil	Loamy
Moisture	Dry

Stonecrops are a large family of over 600 species of succulents, very easily grown in quick-draining soils and sunny spots. 'Tricolor' is a low, creeping variety, with splendidly variegated fleshy leaves of green, cream, and pink in tight little rosettes trailing from short stems. Roots easily; can be invasive.

CCW Sedum Plants

Sedum spectabilis 'Brilliant'

Property	Description
Common Name	Chinese Stonecrop
Height	4 inches
Width	12 inches
Bloom Time	Late Spring
Flower Color	Yellow
Hardiness Zone	4a
Light	Full Sun
Soil	Sandy
Moisture	Dry to Moist

Commonly called Chinese Stonecrop. Evergreen variety with round green leaves on 12" long stems. Yellow flowers tipped with red in May–June. Leaves turn rusty-brown in the winter months.

Sedum spurium 'John Creech'

Property	Description
Common Name	Stonecrop
Height	36 inches
Width	24 inches
Bloom Time	Late Summer
Flower Color	Pink
Hardiness Zone	4a
Light	Full or Part Sun
Soil	Loamy
Moisture	Moist

Large deep purple-blue flowers accented with broad, carmine red nectar bars. Free flowering throughout mid-summer. This summer bloomer has its main crop on the current year's growth. Prune hard in early spring—about 10–12" from the ground.
