CARLISLE'S 30 YEAR GOLDEN SEAL™ WARRANTY

30 Years of Protection

Carlisle's EPDM Classic membranes are known for providing outstanding value, superior long-term performance, low maintenance costs and installation versatility. With a track record in the roofing industry that exceeds 40 years, Carlisle has demonstrated the superiority of its products and now offers an entirely new standard for long-term performance – a 30 Year Golden Seal Warranty.

The 30 Year Golden Seal Watertight Warranty covers:

- Membrane, insulation, fasteners and terminations
- Accidental puncture
- Hail damage
- Wind damage (up to 100 mph)

Over 40 Years of Experience

Over four decades ago, Carlisle pioneered single ply roofing. Today more than nine billion square feet of membrane have been sold. No other membrane manufacturer has a comparable track record.

EPDM's success is due to its many exceptional characteristics, including:

- Material longevity
- Weatherability
- Membrane elasticity
- Stable physical properties

Time Tested.

The system incorporates a 90-mil EPDM membrane that can be adhered to various high performance substrates designed to offer ever-higher levels of performance. Carlisle's top-of-the-line 30 Year System is designed to offer the maximum level of performance by integrating its thickest membrane into the most secure system possible.

Backed by 40 Years of Innovation

Carlisle has led the industry over the years by providing cutting edge technologies to improve system performance while improving installation efficiencies.

- Membranes cleaned in the factory reduces the labor required to assemble a field seam.
- Perimeter securement strips secure membranes at angle changes without adding seams, reducing required maintenance.

90-mil Membrane with Factory-Applied SecurTAPE™

Carlisle also offers the 90-mil membrane with yet another innovation. Carlisle's Factory Applied SecurTAPE is applied by Carlisle in a controlled environment. The

factory application of SecurTAPE provides stronger, more reliable seams. Consistent placement of the SecurTAPE also improves aesthetics as primer lines are eliminated and the tape placement is controlled to a tolerance of plus or minus 1/8".

Factory- Applied SecurTAPE offers labor efficiency on the rooftop. The time to complete a seam is improved by more than 75% with better seam quality.

Call Carlisle Today and Benefit From a 30 Year Warranty.

90-Mil EPDM Classic Membrane:

- Provides unmatched weatherability and durability due to its substantial thickness.
- Offers double the thickness of typical membranes
- Provides superlative longevity with the thickest weathering layer available
- 90-mil resists damage from punctures or hail.
- The membrane withstands the elements
- Membranes withstand the rigors of maintenance personnel
