

5' FleeceBACK® PVC and KEE HP

Introducing 5' FleeceBACK PVC and KEE HP; precision-engineered with a hot-melt extrusion process for total scrim encapsulation, delivering exceptional durability and reflectivity. This premium membrane offers outstanding resistance to chemicals, acids, bases, and even harsh contaminants like restaurant oils and grease, making it the ideal choice for high-performing roofing solutions.

TALKING POINTS

- » Ideal for projects featuring complex roofs with multiple penetrations or limited surface areas
- » Offerings include:
 - 115-mil and 135-mil White PVC
 - 115-mil Gray PVC
 - 115-mil White KEE HP
- » Excellent puncture resistance and breaking strength
- » Polyester reinforcing scrim provides exceptional dimensional stability
- » Cool Roof Rating Council (CRRC) approved
- » KEE HP resists biological growth
- » Reduce thermal bridging with the use of Flexible FAST™ Adhesive
