

SecurFast™ Insulation Fastening Plate

Typical Properties and Characteristics

Size	2 7/8" Hex
Weight/Carton	38 lbs
Quantity	1,000/Carton
Material	AZ50 Galvalume
Thickness	.019"
Corrosion Resistance	Galvalume-Coated Steel meets the FM 4470 test

Typical properties and characteristics are based on samples tested and are not guaranteed for all samples of this product. This data and information is intended as a guide and does not reflect the specification range for any particular property of this product.

Overview

Carlisle's SecurFast Insulation Fastening Plate is specifically designed for coverboard securement under Sure-Seal®, Sure-White®, Sure-Flex™ or Sure-Weld® Roofing Systems. Intended for use in fully adhered single-ply roof systems, SecurFast Plates are stamped from Galvalume®-coated steel for long-term protection against corrosion.

Installation

1. Position plates per Carlisle Specifications.
2. Secure plates using the appropriate Carlisle fastener.

Review Carlisle specifications and details for complete installation information.

Precautions

- » Eye protection is recommended during drilling and installation of fasteners.
