

#9 HORIZONTAL CONTROL JOINT

The **#9 HORIZONTAL CONTROL JOINT** is manufactured for applications over dissimilar substrates. The 45° slope allows water to weep out of the assembly. The lower screed point allows the wall to stay in alignment while also providing stucco movement capabilities to prevent stucco from cracking between dissimilar substrates. The #9 Horizontal Control Joint is part of CEMCO's Water Management Product Line of Stucco Accessories fabricated from minimum 0.018-inch thick hot-dipped galvanized steel complying with ASTM A653 having a minimum G-90 coating complying with ASTM A924 and ASTM C1063 (installation). **Water tested per ASTM E1105.**

*Custom ground sizes available for (CI) Continuous Insulation stucco assemblies.
