CertainTeed Finishing Products

WHO AND WHAT ARE COVERED AND FOR HOW LONG

CertainTeed® warrants to the Original Owner that its Finishing Product will be free from manufacturing defects for one (1) year following delivery to the jobsite, as long as the Finishing Product is applied according to CertainTeed's applicable guidelines, standard industry practices and within the Shelf Life requirements in Table 1. If CertainTeed determines that the Finishing Product is defective, CertainTeed's maximum liability shall be limited only to replacement of the defective Finishing Product or refund of the original purchase price of the defective Finishing Product. CertainTeed will not be responsible for any other costs or expenses.

Since methods and conditions of application and storage, such as temperature, humidity, and over thinning are beyond our control, CertainTeed will not be responsible for the failure of this product when not used and stored according to directions and specifications and accepted standards of procedure inherent in drywall application; or when reasonable allowance is not made by the user for adverse weather and job conditions.

modification, nor shall CertainTeed be liable in the event replacement material varies in comparison to the original product. If CertainTeed replaces any material under this warranty, it may substitute products designated by CertainTeed to be of comparable quality or price range in the event the product initially applied has been discontinued or modified.

PRODUCT STORAGE

Protect ready mixed compounds from extreme heat. Avoid placing product in direct sunlight or in front of heaters. Protect ready mixed compounds from freezing. If freezing does occur, thaw product very slowly (2 to 4 days in a warehouse at 55F/13C); product may survive one or two freeze thaw cycles depending on degree of freezing and particular formula. Product that cannot be mixed smooth with a small amount of water should not be used. Joint compound should be acclimated at 55F (13C) for at least 48 hours prior to application. Setting compounds bags should not be stored directly on concrete floor; dry storage is required. Product beyond recommended dates or if in question for any reason should be tested by CertainTeed's Technical team for evaluation prior to use.

PRODUCT SHELF LIFE

To avoid outdated Finishing Products from being applied, Table 1 below shows the required time periods by which the listed Finishing Products

must be installed. The time periods by product group should allow ample time for distribution channels to sell the Finishing Product and the applicators to apply the Finishing Product before any deterioration of product quality occurs.

The Table below assumes the Finishing Product has been stored as recommended. Poor storage conditions can greatly reduce the Shelf Life of all Finishing Product from that shown in the Table.
