

CertainTeed EasyTouch™

Fiber Glass Insulation

Comfortable. Easy Install.

Great for attics, crawlspaces, above commercial ceiling grids and anywhere a Class A fire rating is needed, CertainTeed's EasyTouch™ insulation is the perfect choice.

Your installs will be easier thanks to the perforated plastic film coating. They'll also be cleaner. You'll see less dust and fewer free particles, so you'll experience less itching and irritation. And it's completely nontoxic. Our sustainable insulation is made using a plant-based binder, so there's no formaldehyde, acrylics, dyes or unnecessary fire retardants added.

EasyTouch is:

- Comfort-coated with EasyTouch perforated plastic film for cleaner, easier installation
- Made with a high percentage of recycled and renewable materials, including a plant-based binder
- Versatile – endless applications
- GREENGUARD® Gold Certified – helps ensure superior indoor air quality

Availability:

R-Value	Width	Length
R13	15"	93", 32'
R19	15", 23", 24"	93", 96"
R21	15"	93"
R25**	15"	25'
R30	16", 24"	48"

* Special widths and lengths may be available. Consult your local territory manager.

** Roll form only.

sustainable insulation™

Application Areas:

Unfaced EasyTouch batts and rolls can be installed in any application where traditional unfaced fiber glass insulation or a fire Class A facing is specified.

- Attics (great for reinsulation)
- Above unheated garage spaces
- Crawlspace
- Rim joists
- Fire places
- Bathroom/laundry areas
- Walls/floors
- Plenum spaces

EasyTouch can also be added to ceilings over unheated areas like garages and crawlspaces.

The map and chart to the right show the Department of Energy recommended R-Values for attic insulation.

Attic insulation is the #1 home improvement homeowners can make to enhance their home's value, returning 117% on its cost.

– Remodeling Magazine, 2016 Cost vs. Value Report

Zone	Attics
1	R-30 to R-49
2-3	R-38 to R-60
4-8	R-49 to R-60
