Ecophon® Solo™ Baffle

Anchor Installation Manual

DESIGN AND SPECIFICATIONS

Use of the Product

Ecophon Solo Baffles are high performing ceiling sound absorbers, capable of being used in applications as the primary acoustic solution when a traditional acoustic ceiling is neither feasible nor aesthetically desirable. Ecophon Solo Baffles are unique, free-hanging units offering numerous design possibilities which can be achieved through various color and suspension options.

Surfaces

Ecophon® Solo panels are manufactured from high-recycled fiberglass content (54% post-consumer). The front and back surfaces consist of the Akutex™ FT finish, which is highly light reflectant (85%), and has exceptional light diffusion (+99%). The sides of the panels are fully painted.

Accessibility

The panels can be easily demounted.

Edge Detail

The panels have square edges that are fully painted. Baffle edges can be field modified. It is recommended to seal cut edges with Ecophon edge sealant. If cutting between the anchors, remove anchor from cut edge and re-insert anchor into baffle matching the position of remaining anchor.

Attachment

Solo Baffle Anchor is a direct attatch product through the use of the Connect Baffle profile.

Cleaning

Daily dusting and vacuum cleaning. Weekly wet wiping.

Fire Performance

Ecophon Solo Baffle panels have been tested according to ASTM E84 and ASTM E1264 (Flame Spread \leq 25; Smoke Development \leq 50).

Influence of Climate

Install in conditions that do not exceed 95% relative humidity and 86-degrees Fahrenheit.
