

DESIGN AND SPECIFICATIONS

Use of the Product

Ecophon Solo panels are a high performance sound absorber, capable of being used as the primary acoustic solution when a traditional acoustic ceiling is neither feasible nor aesthetically desirable. Ecophon Solo is a unique free-hanging unit offering a myriad of design possibilities which can be achieved through various color and suspension options.

Size Availability

1200mm x 1200mm ($\approx 47.25'' \times 47.25''$)
Thickness: 40mm ($\approx 1.5''$)

Surfaces

Ecophon Solo panels are manufactured from high-density fiberglass, boasting an industry-high recycled content [70% post-consumer]. The surface itself consists of the Akutex™ FT finish, which is highly light reflective [85%] and has exceptional light diffusion [+99%]. The Akutex™ FT finish covers both sides of the panel.

Accessibility

The panels are easily demountable.

Influence of Climate

Install in conditions that do not exceed 70% relative humidity and 77-degrees Fahrenheit

Edge Detail

The panels have square edges that are fully painted.

Attachment

There are two methods for attachment for the panels. The first is the use of adjustable wire hangers for variable elevations. The second is the use of adjustable brackets for applications close to the structure. Method of attachment to the structure of any accessory is provided by others.

Weight

The 1200mm x 1200mm x 40mm panels have an approximate weight of 13.2 lbs.

Handling

Use clean cotton gloves when handling product.

Cleaning

Daily dusting and vacuum cleaning. Weekly wet wiping.

Fire Performance

Panels have been tested according to ASTM E84 (Flame Spread ≤ 25) and ASTM E1263 (Smoke Development ≤ 50).
