Protect your walls from the hard hits with CertainTeed's Extreme Drywall Line

Extreme Abuse and Extreme Impact Gypsum Boards provide increased protection and durability required for areas subjected to repeat wear and tear.

EXTREME ABUSE

Provides the increased protection and durability required for abuse prone areas.

- ✓ M2Tech® Technology for enhanced mold and moisture protection
- ✓ Type X fire resistant board
- ✓ Lightweight, low cost solution compared to traditional masonry

Section 092900

Ideal for use in areas such as classrooms, hotel lobbies, patient rooms and public buildings.

EXTREME IMPACT

Fiberglass reinforcement provides the highest level of ASTM classification for soft and hard body impact resistance in the industry.

- ✓ M2Tech® Technology for enhanced mold and moisture protection
- ✓ Type X fire resistant board
- ✓ Lightweight, low cost solution compared to traditional masonry

Section 092900

Ideal for use in hospital corridors, gymnasiums, utility rooms, airport terminals and public buildings.

Outstanding performance in all categories of abuse and impact

ASTM C1629	Surface Abrasion	Soft Body Impact	Hard Body Impact	Indentation Resistance
ASTM Test Method	ASTM D4977 Tests resistance to scuffs and scratches: Board was subjected to abrasive back and forth motion of a wire brush for 50 cycles with 25 lb total load	ASTM E695 Tests impact of heavy soft objects: 60 lb of steel pellets in standard leather bag swung through an angular distance towards the board	ASTM C1629 Annex A. 1 Tests resistance to hard objects into stud cavity: Board was struck with weighted steel ram with increasing weight added until board surface is penetrated	ASTM D5420 Gardner Impact Tests resistance to dents from small hard objects: 2 lb weight dropped onto hemispherical die on board from height of 36", striking with impact energy of 72 inch-pounds
EXTREME ABUSE Classification Levels*	3	2	1	1
EXTREME IMPACT Classification Levels*	3	3	3	1

*The highest possible classification level is 3.

CertainTeed drywall and corner systems are designed to work together to create occupant comfort and long lasting performance.
