ULTRADRAIN® 6200

LEED™ PRODUCT INFORMATION

ULTRADRAIN 6200 drainage composite consists solely of a polypropylene core and polypropylene geotextile filter fabric and contains no Volatile Organic Compounds (VOCs). AQUADRAIN has been successfully used to provide positive drainage on thousands of projects worldwide.

MANUFACTURING LOCATION

CETCO certifies that ULTRADRAIN 6200 drainage composite is manufactured in Atlanta, GA. If your project falls within a 500-mile radius of this location, the product is considered to be a locally produced material and can help contribute to earning Materials & Resources - Credit 5.1.

RECYCLED CONTENT

CETCO certifies that the core of ULTRADRAIN 6200 drainage composite is manufactured with 50% post-consumer material recycled content. Plus excess polypropylene core material is reground and used again in the manufacturing process - pre-consumer recycled content. Please note that this pre-consumer recycled content figures are not absolute. Day to day variations in manufacturing operations will result in minimal variations from the above listed figure. As over 50% of the product is recycled content, ULTRADRAIN 6200 can help to contribute to earning Materials & Resources - Credit 4.1 and Credit 4.2. The geotextile does not contain pre-consumer or post-consumer material.

VOC CONTENT

CETCO certifies that ULTRADRAIN 6200 contains 0 g/L Volatile Organic Compounds (VOCs).
