## **VOLCLAY ULTRASEAL BT® LEED™ PRODUCT INFORMATION**

Volclay Ultraseal BT waterproofing membrane consists of a proprietary sodium bentonite polymer alloy embedded in polypropylene geotextile with a polyethylene geomembrane bonded to one side. Ultraseal BT provides reliable, cost-effective waterproofing protection and contains no Volatile Organic Compounds (VOCs).

### **MANUFACTURING LOCATION**

CETCO certifies that Ultraseal BT is manufactured in Fairmount, GA. If your project falls within a 500-mile radius of this location, the product is considered to be a locally produced material and can help contribute to earning Materials & Resources - Credit 5.1.

### **RECYCLED CONTENT**

CETCO certifies that Ultraseal BT is manufactured with a minimal percentage (< 5%) pre-consumer material recycled content from ordinary recovery of raw materials in the manufacturing processes. Please note that this recycled content figures are not absolute. Day to day variations in manufacturing operations will result in minimal variations from the above listed figure. The product's recycled content from manufacturing raw material recycling process, Ultraseal can help to contribute to earning Materials & Resources - Credit 4.1.

### **VOC CONTENT**

CETCO certifies that Ultraseal BT contains 0 g/L Volatile Organic Compounds (VOCs).

CETCO is committed to the use of recycled content in the manufacturing of Volclay waterproofing products and supports the United States Green Building Council (USGBC) by participating as an USGBC Industry Member.

Sincerely,
