

WATERSTOP-XP EXPANDING STRIP WATERSTOP

EXPANDING WATERSTOP WITH XP TECHNOLOGY FOR CONCRETE CONSTRUCTION JOINTS

APPLICATIONS

Vertical and Horizontal

Nonmoving Concrete Construction Joints

New to Existing Construction

Irregular surfaces

Around Through-wall Penetrations, e.g., Plumbing and Utility Pipes

Around Piles, H-Pile Supports and Other Detailing Applications

WATERSTOP-XP is the next generation of waterstop that expands upon contact with water to form a positive seal to stop water ingress through cast-in-place concrete construction joints and around pipe penetrations. Through the use of the patented XP technology, WATERSTOP-XP is proven effective in a wide range of contaminated environments, including high-saline conditions. Its flexible design also makes it effective for both horizontal and vertical joints.

WATERSTOP-XP is manufactured in lightweight, flexible coils and designed to provide greater performance predictability than passive PVC/rubber dumbbell waterstops – eliminating the requirement of special pieces, split-forming and seam welding.

WATERSTOP-XP EXPANDING STRIP WATERSTOP

Exceptional Waterproofing Performance:

Protection from Water Ingress:

- Can expand several times its volume to fill voids.
- Ends naturally join together to form one continuous waterstop.
- Effective seals pipe penetrations that PVC waterstops cannot efficiently seal.
- Proven effective in structures under continuous or intermittent hydrostatic pressure.

Protection from Contaminants:

- XP technology resists a wide-range of contaminants, including high-saline conditions and dilute organic solvents.

Installation Benefits and Features:

Fast and Easy:

- Manufactured in lightweight, flexible coils.
- Can be easily installed by a single worker.
- Requires no special pieces, seam welding or split forming.

Versatility:

- Can be adhered in place using CETSEAL™ or mechanically secured with REVO-FIX and fasteners.
- Pliability allows installation around through-wall/slab and pipe penetrations.
- Easily transitions from horizontal to vertical applications to form a continuous waterstop.

Used with CETCO COREFLEX® or ULTRASEAL® membranes, WATERSTOP-XP qualifies for the HydroShield™ Quality Assurance Program.

Protect your structure from water ingress with the industry's leading quality assurance program. This proven, systematic approach provides a no-dollar-limit warranty for 100 percent, non-prorated protection for the entire term of the warranty. For more information visit cetco.com.
