

INTERIOR 360TRAK™

A high-performance solution for intricate, dramatic architecture.

ClarkDietrich 360TRAK™ flexible framing products are low-cost, high-performance framing solutions for non load-bearing curves, bends, variable radii and arches for dramatic and distinctive ceilings, walls and bulkheads.

Today’s customers want elaborate and complex architecture including sweeping bulkheads, curved walls, wavy ceilings, and elliptical curves.

- Easily hand bends or forms to the desired curve or bend with varying radii
- One product for both curves and arches
- Use with wood or steel studs

HINGED TRACK BRACKETS

The 360TRAK provides hinged track brackets with pivot points every 3", allowing for smooth, curved framing assemblies with tight and varying radii. Pre-drilled holes are located on each side of the track brackets for securing the stud to the bracket.

ADJUSTABLE LEG STRAPS

360TRAK flexible framing products feature adjustable leg straps that slide through the pivoting track brackets allowing the track to contour to your desired curve, bend or radius. The adjustable leg straps create curvable flexibility, while maintaining or holding its shape during installation.

360TRAK™

Product code	Thickness			Length (ft)	Size (in)
	Gauge (mils)	Design thickness (in)	Yield Strength		
360FT	20ga DW (30mils)	0.0312	33ksi	10'	2-1/2
					3-5/8
					4
					6

NOTES: G40 coating. Use only in nonload-bearing applications.
