

#701A/#801A Zinc J-TRIM

Provides clean, neat edge protection at gypsum panel terminations for one- and two-coat veneer plaster finishes

Veneer trims 701A and 801A are J-shaped trims formed from galvanized steel to fit standard 1/2" and 5/8" gypsum panel depths with grounds to accommodate veneer finishes. These trims provide clean, neat edge protection for one- or two-coat veneer plaster finishes at gypsum panel terminations to wall openings and wall or ceiling intersections. 701A provides 3/32" grounds for two-coat veneers and 801A has 1/16" grounds for one-coat veneer plaster.

Zinc veneer trims are the zinc equivalents of 701A and 801A J-Trim with the added benefit of providing ultimate corrosion protection for cement board and exterior applications. These trims provide clean, neat edge protection at wall or ceiling intersections, or wall terminations for one- and two-coat veneer plaster systems.

Material: .012" 99.97% pure zinc, compliant with ASTM B-69
