

ClarkDietrich Moment Clip

Moment connection for knee walls and shear walls to the structure foundation.

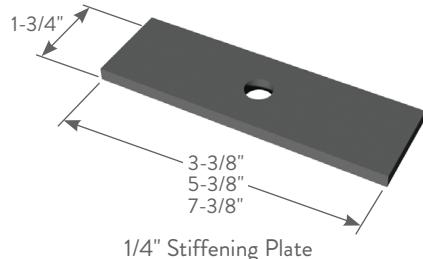

ClarkDietrich moment clips are high-performance, cost effective solutions for knee wall-to-foundation connections and shear wall-to-foundation connections. These multi-application clips feature a 1/4" thick A36 steel stiffening plate that provides superior design values for maximum performance. The moment clips are designed to resist horizontal, torsional and vertical (uplift) loads. These clips are prepunched with a series of attachment holes for steel framing connections and a 1/2" anchor bolt hole for foundation connections.

PRODUCT DIMENSIONS

2" x 4" x 3-1/2"
2" x 4" x 5-1/2"
2" x 4" x 7-1/2"

1/4" A36 steel stiffening plate

1-3/4" x 3-3/8"
1-3/4" x 5-3/8"
1-3/4" x 7-3/8"

MATERIAL SPECIFICATIONS

Gauge: 14 gauge (68mil)
Design Thickness: 0.0713 inches

Gauge: 12 gauge (97mil)
Design Thickness: 0.1017 inches

Gauge: 10 gauge (118mil)
Design Thickness: 0.1242 inches

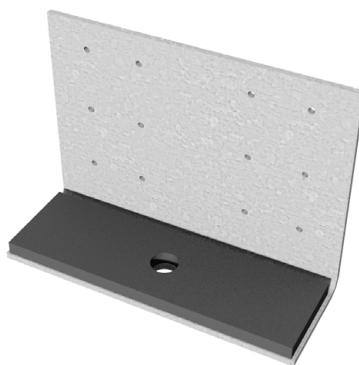

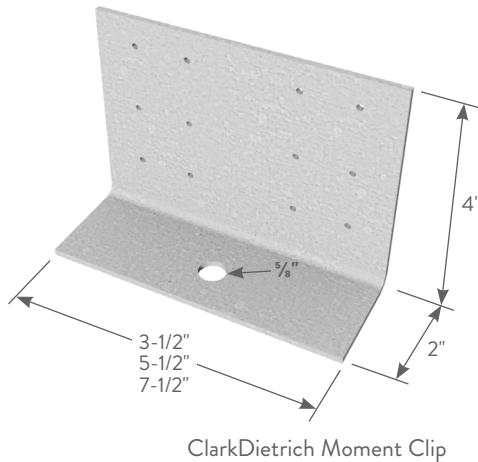

Coating: G90
Yield Strength: 50ksi
ASTM: A36, A653, A1003

INSTALLATION

Secure the Moment Clip to the steel framing member by using #12 screws in the prepunched holes. Number of screws and screw pattern is based on load required to achieve listed capacities.

Place 1/4" steel stiffening plate on top of short leg of Moment Clip so anchor holes are aligned.

Secure 1/4" steel stiffening plate and Moment Clip to foundation using 1/2" x 2" long Hilti Kwik-Bolt 3 or alternate anchorage calculated to resist the tension load for your specific application.

ClarkDietrich Moment Clip w/ Stiffening Plate

Notes:

- 1 Cells marked with a "1" in shear column indicate that the shear capacity is limited to 1628 lbs when using 1/2" x 2" Hilti Kwik-Bolts into 3000psi concrete.
- 2 Cells marked with a "2" in tension column indicate that the tension capacity is limited to 1509 lbs when using 1/2" x 2" Hilti Kwik-Bolts into 3000psi concrete.
- 3 Cells marked with a "3" in the moment column indicate that the moment capacity is limited to 1761 in-lbs for 3-Series clips, 2767 in-lbs for 5-Series clips, and 3773 in-lbs for 7-Series clips when using 1/2" x 2" Hilti Kwik-Bolts into 3000psi concrete.
- 4 Capacities listed in the table/notes assume that no load reductions are required for spacing or edge distance of Kwik-Bolts.
- 5 Capacities listed in the table represent the capacity of the clip and the screws to the stud. Capacities listed in notes 1-3 are limits if the specified connector to the structure is used. Other 1/2" dia. anchors may be used to achieve the full clip capacity but must be designed separately.
- 6 Moment capacities listed as Max. load/Factor of Safety. Loads must be limited by serviceability load taken as stiffness times the serviceability limit in radians.
- 7 Stiffness is the max. allowable clip moment divided by the clip rotation measured at the max. allowable clip moment.
- 8 No stud-to-track connection is required. Higher loads can be achieved when stud-to-track is connected.
- 9 Use a linear interaction equation for connections involving any combination of F1, F2, and M.
- 10 Allowable loads have not been increased for wind, seismic, or other factors.
- 11 Torsional effects are considered on screw group for F1 & F2 (Shear & Tension) allowable loads.
- 12 Hilti is a registered trademark of Hilti Aktiengesellschaft Corporation.
- 13 It is the responsibility of the designer to properly detail connections on the contract drawings.
