Pony Wall Lite 48" (LGPW48)
Partial wall framing connection to floor

ClarkDietrich Pony Wall Lite is intended to support out-of-plane loading of cantilevered partial wall systems that are unsupported at the top track. Out-of-plane loads are transferred to the floor system through the base-plate, which is welded to the Pony Wall Lite stud member.
For allowable loads and multiple connection options, reference www.clarkdietrich.com/ponywall for more information.
