SAFETY DATA SHEET
October 2017

1. Identification

Product identifier
Continental Joint Compound, Ready Mix

Other means of identification

Recommended use
Joint Compound is used for gypsum board finishing in commercial and residential construction.

Recommended restrictions
See Packaging.

Manufacturer/Importer/Supplier/Distributor information

Supplier:
Continental Building Products Operating Company, LLC
12950 Worldgate Drive, Suite 700, Herndon, VA 20170
800-237-5505
Technical Manager
info@continental-bp.com

Manufacturer:
Continental Building Products / Continental Building Products Canada Inc
5145 Mary Ingles Hwy, Silver Grove,
KY 41085, USA
8802 Boulevard Industriel
Chambly, Quebec J3L 4X3, Canada

Emergency phone number
24/7 Hotline: USA/Canada - 1.855-243-2286 (access code: 14451)

2. Hazard(s) identification

Physical hazards
Not classified.

Health hazards
Carcinogenicity
Specific target organ toxicity, repeated exposure
Category 1A
Category 2 (Lung)

OSHA defined hazards
Not classified.

Label elements

Signal word
Danger

Hazard statement
May cause cancer. May cause damage to organs (Lung) through prolonged or repeated exposure.

Precautionary statement
Prevention
Do not handle until all safety precautions have been read and understood. Wear protective gloves/eye protection/face protection. Do not breathe dust/mist/spray.

Response
If exposed, concerned, or if you feel unwell: Call a poison center/doctor.

Storage
Store in closed container.

Disposal
Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)
Like all limestone and gypsum based Joint Compounds, low concentrations of crystalline silica are present as a natural impurity.
3. Composition/information on ingredients

Composition comments

All concentrations are in percent by weight. Raw material in this product contains respirable crystalline silica as an impurity. Independent testing of this product suggests that under most conditions of use, this product will not result in exposure to respirable crystalline silica that exceeds OSHA's Action Level (AL) or Permissible Exposure Limit (PEL). However, actual concentrations of respirable silica may vary based on the conditions of use. Specific exposures can only be determined by workplace industrial hygiene testing.

4. First-aid measures

Inhalation

Move injured person into fresh air and keep person calm under observation. If breathing is difficult, give oxygen. Get medical attention.

Skin contact

Wash with water and a pH neutral soap or a mild skin detergent. Get medical attention if irritation develops and persists.

Eye contact

Do not rub eyes. Flush thoroughly with water. If irritation occurs, get medical assistance.

Ingestion

Practically non-toxic. Ingestion is not anticipated under normal working conditions. DO NOT induce vomiting. Rinse mouth thoroughly with water and give large amounts of milk or water, if person is conscious. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Irritation of nose and throat. Irritation of eyes and mucous membranes. Dust may irritate throat and respiratory system and cause coughing.

Indication of immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Symptoms may be delayed.

General information

Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media

Use fire-extinguishing media appropriate for surrounding materials.

Unsuitable extinguishing media

Not applicable. Not a fire hazard.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Use personal protection as recommended in Section 8 of the SDS. Keep unnecessary personnel away

Methods and materials for containment and cleaning up

Scrape up with shovels into a suitable container for recycle or disposal. Use methods to minimize the generation of nuisance dusts. Vacuum up the spilled material. Vacuums used for this purpose should be equipped with HEPA filters. If sweeping of a contaminated area is necessary use a dust suppressant agent which does not react with the product. Collect in approved containers and seal securely. For waste disposal, see Section 13 of the SDS.

Environmental precautions

Avoid discharge into drains, water courses or onto the ground.

7. Handling and storage

Precautions for safe handling

Stack containers of material in a secure manner to prevent falling. Do not stack more than 3 pails high to prevent container failure. For boxes, do not stack more than 3 boxes high for Fullweight and Midweight compounds, and not more than 4 boxes high for Lightweight compounds. Joint compound containers are heavy and pose risks such as sprains and strains to the back, arms, shoulders and legs during lifting and mixing. Use work methods which minimize dust production. Cutting, crushing, sanding or grinding joint compound, drywall or other crystalline silica-bearing materials will release respirable crystalline silica. Avoid inhalation of dust and contact with skin and eyes. Do not use if material has spoiled and is moldy or has an unpleasant odor. Use only in well-ventilated areas. Observe good industrial hygiene practices.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well-ventilated place. Protect from freezing and direct sunlight. Store away from incompatible materials.
8. Exposure controls/personal protection

Biological limit values

No biological exposure limits noted for the ingredient(s).

Exposure guidelines

Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica should be monitored and controlled when cutting or grinding.

Appropriate engineering controls

Utilize methods to minimize dust production including pole sanders and/or sanders equipped with vacuum capabilities whenever possible to maintain a dust level below the AL/TLV.

Individual protection measures, such as personal protective equipment

- **Eye/face protection**: ANSI approved safety glasses or goggles.
- **Skin/Hand protection**: Gloves, and protective clothing may be utilized.
- **Respiratory protection**: A NIOSH approved particulate respirator is recommended if the PEL is exceeded. OSHA’s 29 CFR 1910.134 (Respiratory Protection Standard) must be followed whenever work conditions require respirator use.
- **Thermal hazards**: When material is heated, wear gloves to protect against thermal burns.
- **General hygiene considerations**: When using, do not eat, drink or smoke. Wash hands after handling. Handle in accordance with good industrial hygiene and safety practice.
9. Physical and chemical properties

**Appearance**
- Paste.

**Physical state**
- Solid.

**Form**
- Solid. / Paste.

**Color**
- Beige or white.

**Odor**
- Low.

**Odor threshold**
- Not available.

**pH**
- 7 - 10 [aqueous solution] 32 °F (0 °C)

**Melting point/freezing point**
- 212 °F (100 °C)

**Initial boiling point and boiling range**
- > 203.0 °F (> 95.0 °C)

**Flash point**
- Not available.

**Evaporation rate**
- Not available.

**Flammability (solid, gas)**
- Not available.

**Upper/lower flammability or explosive limits**

| Flammability limit - lower (%) | Not applicable. |
| Flammability limit - upper (%) | Not applicable. |
| Explosive limit - lower (%)    | Not applicable. |
| Explosive limit - upper (%)    | Not applicable. |

**Vapor pressure**
- 7 mm Hg (20°C)

**Vapor density**
- 0.62 Based on water.

**Relative density**
- 0.9 - 1.7

**Solubility(ies)**

| Solubility (water) | Completely dispersed. |

**Partition coefficient (n-octanol/water)**
- Not available.

**Auto-ignition temperature**
- Not applicable.

**Decomposition temperature**
- Not available.

**Viscosity**
- 300 - 650 Brabender units

**Other information**

| Percent volatile | 30 - 60 % v/v |
| VOC (Weight %)    | < 2 g/l |

10. Stability and reactivity

**Reactivity**
- The product is stable and non-reactive under normal conditions of use, storage and transport.

**Chemical stability**
- Material is stable under normal conditions.

**Possibility of hazardous reactions**
- Hazardous polymerization does not occur.

**Conditions to avoid**
- Contact with incompatible materials.

**Incompatible materials**

**Hazardous decomposition products**
- Sulfur oxides. Calcium oxides. Ammonia.

11. Toxicological information

**Information on likely routes of exposure**

| Inhalation | Dust may irritate respiratory system. May cause cancer by inhalation. |
| Skin contact | Prolonged or repeated contact may dry skin and cause irritation. |
| Eye contact | Dust may irritate the eyes. |
| Ingestion | Not an anticipated route of exposure under normal working conditions. May cause discomfort if swallowed. May cause irritation of the gastrointestinal tract. |
Symptoms related to the physical, chemical and toxicological characteristics

Irritation of eyes and mucous membranes. Irritation of nose and throat. Dust may irritate throat and respiratory system and cause coughing.

Information on toxicological effects

Acute toxicity

May cause discomfort if swallowed.

Components

<table>
<thead>
<tr>
<th>Species</th>
<th>Test Results</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oral - LD50</td>
<td>&gt; 25000 mg/kg</td>
</tr>
</tbody>
</table>

Skin corrosion/irritation

Dust may cause mechanical irritation of skin.

Serious eye damage/eye irritation

Dust in the eyes will cause irritation.

Respiratory or skin sensitization

No data available.

Respiratory sensitization

Not a skin sensitizer.

Skin sensitization

No data available.

Germ cell mutagenicity

This product contains crystalline silica (quartz) as a naturally occurring impurity. The International Agency for Research on Cancer (IARC) and the National Toxicology Program classify respirable crystalline silica as known human carcinogens. Independent testing of this product suggests that under most conditions of use, this product will not result in exposure to respirable crystalline silica that exceeds OSHA's Action Level, (AL) or Permissible Exposure Limit (PEL). Exposures to respirable crystalline silica at or above the OSHA AL, or PEL are not expected during the recommended use of this product. However, actual concentrations of respirable silica may vary based on the conditions of use. Specific exposures can only be determined by workplace industrial hygiene testing.

IARC Monographs. Overall Evaluation of Carcinogenicity

Crystalline Silica (CAS 14808-60-7) 1 Carcinogenic to humans.
Polyvinyl Acetate (CAS 9003-20-7) 3 Not classifiable as to carcinogenicity to humans.

NTP Report on Carcinogens

Crystalline Silica (CAS 14808-60-7) Known To Be Human Carcinogen.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Not listed

Reproductive toxicity

No data available.

Specific target organ toxicity - single exposure

No data available.

Specific target organ toxicity - repeated exposure

May cause damage to organs (Lung) through prolonged or repeated exposure (inhalation).

Aspiration hazard

Not classified.

Chronic effects

Prolonged and routine inhalation of fine quartz dust can lead to the lung disease known as silicosis. Pre-existing respiratory conditions including asthma and chronic lung disease might be aggravated by exposure.

12. Ecological information

Ecotoxicity

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

Persistence and degradability

No data available.

Bioaccumulative potential

No data available.

Mobility in soil

The product is soluble in water.

Other adverse effects

No data available.

13. Disposal considerations

Disposal instructions

Dispose in accordance with all applicable regulations. Do not discharge into drains, water courses or onto the ground.

Hazardous waste code

The Waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products
Contaminated packaging

Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

DOT
Not regulated as dangerous goods.

IATA
Not regulated as dangerous goods.

IMDG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
This substance/mixture is not intended to be transported in bulk.

15. Regulatory information

US federal regulations
This product is a “Hazardous Chemical” as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.
CERCLA/SARA Hazardous Substances - Not applicable.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)
Not listed.

CERCLA Hazardous Substance List (40 CFR 302.4)
Not listed.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories
Immediate Hazard - Yes
Delayed Hazard - Yes
Fire Hazard - No
Pressure Hazard - No
Reactivity Hazard - No

SARA 302 Extremely hazardous substance
Not Listed

SARA 311/312 Hazardous chemical
Yes

SARA 313 (TRI reporting)
Not regulated

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List
Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130)
Not regulated

Safe Drinking Water Act (SDWA)
Not regulated

US state regulations
