Re: VALTO Engineered Materials Brand Change; Crane Composites

To Whom It May Concern,

Crane Composites, established in 1954, is a leading provider of FRP composite panels. Crane Composites changed its name to VALTO Engineered Materials starting September 2nd, 2025, as part of an ongoing commitment to innovation and growth. An excerpt from our announcement is below:

“Crane Composites, a leading designer and manufacturer of high-quality fiberglass reinforced panels (“FRP”), has rebranded as VALTO Engineered Materials (“VALTO”) to mark the company’s next chapter of growth.”

Only our name has changed. Our quality and commitment to the industry stay the same.

All brand names under the Crane Composites name, including DESIGNS, GLASBORD®, SEQUENTIA®, and VARIETEX®; are now rolled up under the VALTO Engineered Materials company name. Should you have any additional questions regarding VALTO products, please feel free to contact me directly. I appreciate your inquiry.

Sincerely,

Matthew Shields
