

A27 Turnbuckle Form Aligner

The A27 Turnbuckle Form Aligner consists of a 1-1/2" x 1-1/2" x 20" angle welded to a 1" diameter turnbuckle assembly. The self-cleaning coil thread offers quick adjustment for plumbing and aligning formwork. Minimum overall length of the aligner is 37". Maximum extended overall length is 40".

Nail holes in the angle allow the unit to be affixed to a length of 2x4 or 2x6 to extend the effective length of the aligner. The nailing plate is furnished with nail holes for attaching to the form and also has a 15/16" hole. The safe working load of the form aligner is limited by the lumber and nailing procedures.

To Order:
Specify: (1) quantity, (2) name.

Example:
75 pcs., A27 Turnbuckle Form Liner.

SAFETY NOTE:

A27 Turnbuckle Form Aligner is not designed for use as bracing resisting wind loads.
