GENERAL INFORMATION

HANGERMATE®

Rod Hanging Anchors

PRODUCT DESCRIPTION

HangerMate is an all steel threaded fastening system for suspending steel threaded rod vertically overhead in pipe hanging, fire protection, electrical conduit and cable-tray applications. They are available in versions which can be installed in a variety of base materials including steel purlins, bar joists and beams, wood frame columns and beams, as well as concrete ceilings, beams and columns.

Steel threaded rods in 1/4" and 3/8" diameters can be vertically suspended with HangerMate (a 1/2" diameter size is also available for wood). They are also offered in a side mount style for lateral installation of 1/4" and 3/8" diameter steel threaded rods onto joists, columns and overhead members. For all steel and wood hangers, a HangerMate Socket Driver is recommended to provide proper installation with a drill screw gun. For concrete hangers, a powered impact tool with a maximum impact wrench power of 120 ft-lb is recommended.

A pivot head version is also available for flexible connection angle and positioning of rod hangers. An acoustical ceiling eyelet version is also available for hanging wire or cable attachments.

HVAC Ductwork and Strut Channels

• Mounting Security Equipment

• Suspended Ceilings

GENERAL APPLICATIONS AND USES

- Hanging Pipe and Sprinkler Systems
- Suspending Conduit and Cable Trays
- Lighting Systems and Overhead Utilities
- FEATURES AND BENEFITS
- + Ease and speed of overhead installation
- + Lower in-place cost, when compared to beam clamps, lag bolts and dropins
- + Steel and wood HangerMate can be installed with a drill screw gun
- + Side mount versions available for steel and wood HangerMate
- + Socket drivers, pole tool and accessories to optimize ease of installation

APPROVALS AND LISTINGS

- FM Approvals (FM) see listing for applicable sizes and types Pipe Hangers components for automatic sprinkler systems - File No. JI 3015153
- Underwriters Laboratory (UL) see listing for applicable sizes and types Pipe Hangers - File No. EX 1289

GUIDE SPECIFICATIONS

CSI Divisions: 03 16 00 - Concrete Anchors, 05 05 23 - Metal Fastenings and 06 05 23 - Wood, Plastic, and Composite Fastenings. Rod Hangers shall be HangerMate anchors as supplied by DEWALT, Towson, MD. Anchors shall be installed in accordance with published instruction and the Authority Having Jurisdiction.

CONCRETE HANGERMATE

ANCHOR MATERIALS

• Zinc Plated Carbon Steel

ANCHOR SIZE RANGE (TYP.)

- 1/4" to 3/8" for Steel
- 1/4" to 1/2" for Wood
- 1/4" to 3/8" for Concrete (Threaded Coupler Heads)

THREAD VERSION

• Unified Coarse Thread (UNC)

SUITABLE BASE MATERIALS

- Steel Purlins and Beams
- Wood and Timber
- Concrete Members

ECHANICAL

MECHANICAL ANCHORS

Component	Component Material
Screw Body	Case hardened carbon steel
Coupling (UNC thread) / Eyelet	Case hardened carbon steel
Zinc Plating	ASTM B633, SC1, Type III (Fe/Zn5)

INSTALLATION SPECIFICATIONS

Steel HangerMate

Socket Driver Size (in.) 5/8 5/8 5/8									
Note: the side mount couplings hav	e full thread depth (t	hrough head).							

Installation Guidelines

1. If pre-drilling is required (certain types of wood truss/wood joist and all concrete base materials), select the recommended drill bit type and diameter.

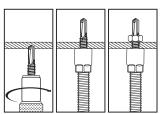

For Concrete HangerMate, drill a hole to the appropriate embedment depth, adding at least 1/4" to the drilling depth to prevent the tip of the fastener from running into the back of the anchor hole during installation.

2. Select the appropriate socket driver for the anchor size and type to be installed and mount into chuck of installation tool. Insert the HangerMate coupling into the socket driver, and install perpendicular to the base material surface. Drive the fastener with a smooth steady motion until the driver and coupling is seated against the surface of the base material. 3. Thread the appropriate diameter steel threaded rod or threaded bolt into the coupling. The threaded rod or bolt should fully engage the thread length of the coupling on a vertical mount fastener. The threaded rod or threaded portion of the bolt can pass through coupling of a side mount fastener.

When installing HangerMate, eye protection should be worn as a safety precaution.

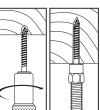

For UL and/or FM listings for hangers Steel HangerMate should be installed with a retaining nut for parts that are packaged with a nut (see performance data and listings as applicable). Suggested drill speed for Steel HangerMate installations is 1200 to 1800 rpm.

Steel

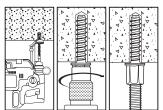

Install with appropriate sized steel socket driver. (side and variable mount direction versions not pictured)

Wood

Install with appropriate sized wood socket driver. (side and variable mount direction versions not pictured)

Concrete

Install with appropriate sized concrete socket driver. (variable mount direction version not pictured)

1. The values listed above are ultimate load capacities which must be reduced by a minimum safety factor of 3.0 or greater to determine the allowable working load.

The values instea above are duminate load capacities which must be reduced by a minimum safety factor of 5.0 of greater to determine the allowable working load
The strength of the threaded rod used with the HangerMate anchors must be considered when determining the controlling load capacity of the assembly.

Ultimate load capacity for PFM2231500 or PFM2231550 acoustical ceiling eyelets installed into 20 gauge steel deck members is 300 lbs.

PFM2281300	3/8	3/16" x 2"	Variable	3/16	1-3/4	800 (Vertical) 875 (load at 45°)					

1. The values listed above are ultimate load capacities for anchors installed in uncracked normal weight concrete.

2. The values listed above are ultimate load capacities which must be reduced by a minimum safety factor of 4.0 or greater to determine the allowable working load.

3. Linear interpolation may be used to determine load capacities for intermediate compressive strengths.

Concrete HangerMate – Ultimate Load Capacities when Installed Through Metal Deck into Lightweight Concrete^{1,2,3,4}

						V		
						Lightweight Concrete Over Metal Deck f'c \geq 3,000 psi $\label{eq:concrete} 4\text{-}1/2^{\prime\prime} \mbox{ Wide Deck}$		
Cat No.	Rod Coupler Size	Screw	Mount	ANSI Drill Bit Diameter	Embedment Depth			
	in.	Description	Direction	in.	in.	Tension Ibs.	Load at 45° Ibs.	
PFM2217171	1/4	1/4" x 1-1/4"	Vertical	1/4	1-1/4	800	1,140	
PFM2217173	3/8	1/4" x 1-1/2"	Vertical	1/4	1-1/2	1,780	1,500	

1. The values listed above are ultimate load capacities for anchors installed in uncracked sand-lightweight concrete.

2. The metal deck shall not exceed 18 gauge (0.048-inch base metal thickness) and conform to ASTM A653.

3. The values listed above are ultimate load capacities which must be reduced by a minimum safety factor of 4.0 or greater to determine the allowable working load.

4. The tabulated load values are for anchors installed with a minimum lower flute edge distance of 1-1/8-inch; or in the upper flute with consideration for integral washer clearance.

Concrete HangerMate – Ultimate Load Capacities when Installed in Hollow Core Concrete Plank¹²

Cat No.	Rod Coupler Size in.	Screw Description	Mount Direction	ANSI Drill Bit Diameter in.	Embedment Depth in.	Tension, Center of Web Ibs.	Tension, Center of Core Ibs.
PFM2217171	1/4	1/4" x 1-1/4"	Vertical	1/4	1-1/4	2,775	1,920
PFM2217173	3/8	1/4" x 1-1/2"	Vertical	1/4	1-1/2	3,700	2,570

1. Tabulated load values are for anchors installed in 8-inch-thick uncracked hollow core concrete with minimum compressive strength of 5,000 psi at the time of installation. The normal-weight concrete must have 1-1/2" cover above and below cores and a minimum web thickness of 1-1/2".

2. The values listed above are ultimate load capacities which must be reduced by a minimum safety factor of 4.0 or greater to determine the allowable working load.
