ANCHORS & FASTENERS

CODE LISTED
ICC-ES ESR-3912
CONCRETE

ICC-ES APPROVED
3/4" long approved seismic anchor

PATENT GRANTED GEOMETRY
Design bites into concrete for undercut

THREADED SLEEVE
Internally tapped sleeve provides full thread engagement

MINI-UNDERCUT+™ INTERNALLY THREADED UNDERCUT ANCHOR

The Mini-Undercut+™ anchor is an internally threaded, self-undercutting anchor designed for performance in cracked and uncracked concrete. Suitable base materials include post-tension concrete (PT slabs), hollow-core precast concrete, normal-weight concrete and lightweight concrete. The Mini-Undercut+™ anchor is installed into a pre-drilled hole with a power tool and a setting tool. After installation a steel element is threaded into the anchor body. The result is an anchor which can provide consistent behavior at shallow embedments as low as 3/4 of an inch.

GUARANTEED TOUGH.®
