

DuPont™  
**Tyvek®**  
 Wrap Caps

**Performance in the Details:  
 DuPont Tyvek® Wrap Caps**

The 1-inch plastic cap increases holding power and reduces tears, and features a triple-feather seal that provides an effective air barrier.

**APPLICATION**

Recommended for fastening DuPont™ Tyvek® family of products, DuPont™ Tyvek® Wrap Caps increase holding power and reduce tears.

**FEATURES / BENEFITS**

DuPont™ Tyvek® Wrap Caps, whether applied by hand or pneumatically with the new **Plasti-Tacker™ Pro** pneumatic cap nailing system by National Nail Corporation and Hitachi Power Tools, are the quality alternative fastening solution for the Tyvek® family of products.

The one-inch diameter high density polyethylene cap is engineered to distribute maximum holding power to the perimeter of the cap, reducing jobsite blow-offs, and the patented triple-feather seal provides an effective barrier to air infiltration.

Wrap Caps are made of a nonconductive material that acts as a thermal barrier, resisting heat transfer, and siding nails easily penetrate the cap. Save time, money and provide a premium installation with Wrap Caps for all your DuPont™ Tyvek® installations.

**TECHNICAL DATA**

**Cap Diameter**—1-inch  
**Cap material**—High-density polyethylene with UV inhibitors  
**Cap Color**—White

**Nail shank style / Diameter / Finish**

- **1-inch hand drive**—ring shank / .105 / electro galvanized
- **1-1/2 inch hand drive**—spiral shank / .110 / bright
- **2-inch hand drive**—spiral shank / .110 / bright
- **1-1/4 inch collated**—ring shank / .083 / electro-galvanized
- **2-inch collated**—ring shank / .083 / electro-galvanized
