

PRODUCT DATA SHEET

Migutan FP 155

Watertight, Plaza Deck, & Split Slab Expansion Joint

Product Description

Migutan (mig-yoo-tan) by Sika Emseal consists of heavy-duty extruded aluminum retainer rails, synthetic rubber side flashing sheets, a thermo-plastic rubber sealing insert, and stainless-steel retainer caps.

The rails are bolted to the structural slab, the flashing sheets are integrated in a sandwich with the deck waterproofing system.

The sealing insert is installed over the upper end of the flashing sheets and is held in compression by the stain-less-steel retainer caps.

The net result is the <u>Migutan System</u> that integrates the structural slab, deck waterproofing and expansion joint system which is essentially independent of the wear-course components (ex: pavers, asphalt topping, concrete topping, etc.) while ensuring that movement is properly accommodated.

Uses

- Plaza Decks
- Split-Slab Parking Decks
- Roof Decks
- · Below-Grade Deck and Wall Joints

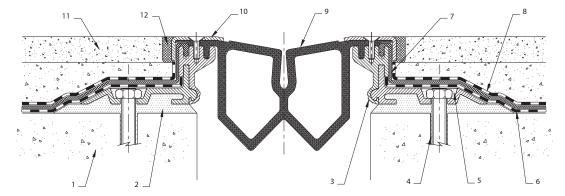

Load Capacity

Plaza and Parking Decks: FP 155/45 - FP 155/115: Suitable for slow moving vehicles with pneumatic tires such as cars and light trucks up to 16,860 lb.wt. (75 kN) gross.

BUILDING TRUST

Ramps, Loading Docks or other Decks with Continuous Heavy-Duty (Truck, Bus) Vehicular Traffic: Use steel legs — Consult Sika Emseal

System Features (in order of installation)

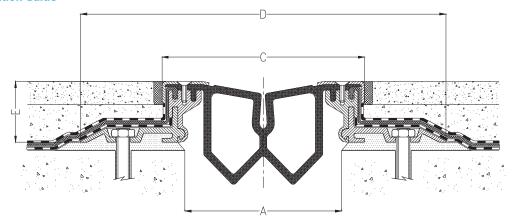

Key to system features

- 1. Structural slab
- Epoxy levelling bed ensures that retainer legs are fully supported while acting as a dielectric separator
- 3. Two or three piece interlocked retainer legs are free to slide relative to each other to provide positive interlocking of successive joint lengths. (NOTE: Heavy-duty steel leg profiles & FP 155/25 interlocked by means of stainless steel connector pins)
- 5/16" x 4" (8mm x 100mm) epoxy anchors at 12-inch (300mm) centers ensure secure fastening while placing no stress on concrete joint edge. (NOTE: FP 155/25 uses counter-sink-head expansion anchors.)

- Level-filled anchor channels protect waterproofing from damage
- Deck waterproofing is installed across deck and up Migutan retainer leg
- Heat-weldable, high-nitrile PVC side flashing sheets are fully embedded in, welded to or adhered to upper surface of primary deck waterproofing
- Overlay and deck membranes encapsulate Migutan flashing sheet in watertight sandwich
- Heat-weldable sealing gland allows for watertight heat-welded transitions in direction and plane

- Stainless-steel retaining caps and machine-screws clamp sealing gland and flashing sheet and are removable for seal maintenance
- 11. Pavers, asphalt, fill, or other wear-surface
- 12. Self-levelling, traffic-grade sealant control joint (as needed to suit application consult Sika Emseal)

Note: Steel legs are now available for increased loading capacity for all leg heights from FP 155/80 and larger. Contact EMSEAL for sizing and technical information on product variations

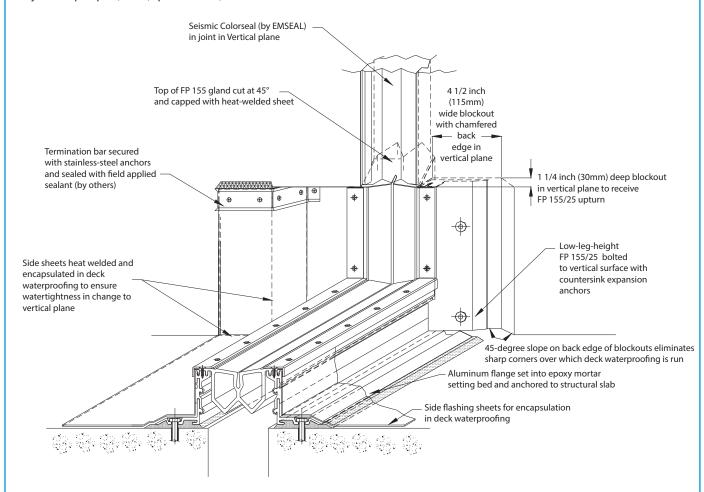

Watertight Transitions & Terminations

Factory-heat-welded thermoplastic-rubber sealing insert and heat-weldable side sheets as well as factory-welded aluminum components assure watertightness through transitions and terminations. Virtually any kind of transition is both possible and practical.

Transitions From Horizontal to Vertical Planes

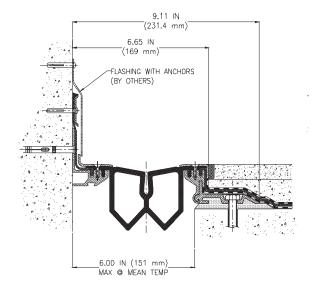

Transitions to the vertical plane are commonly overlooked in design, manufacture and installation. These details are critical to watertightness and can be properly addressed by the Migutan system with transition into other products by EMSEAL for waterproofing the joints in parapets, walls, split columns, etc.

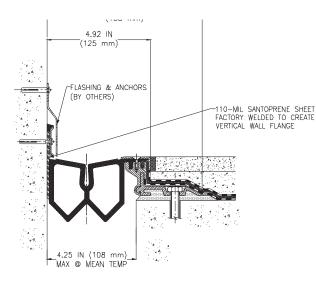

E-2, E3 & E-8 Deck-to-Wall Options (available for all models)

E-2

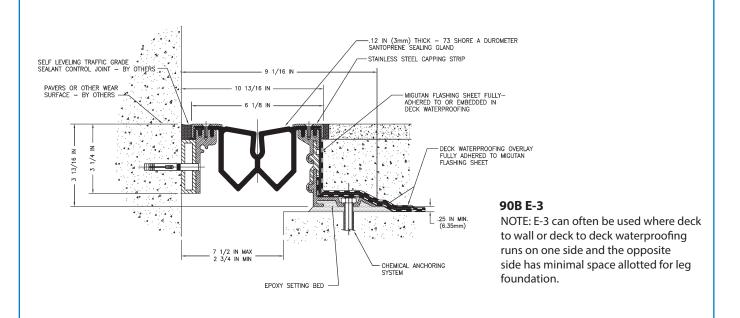

NOTE: Use E-2 where continuous runs of deck-to-wall joint are uninterrupted by columns or other elements adjacent to the run of the joint.

E-8

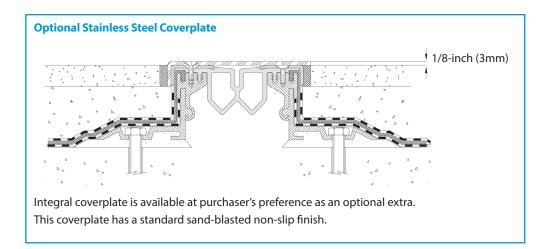

NOTE: Use E-8 where joint-gap alternates from deck-to-deck to deck-to-column or wall at intervals along the joint.

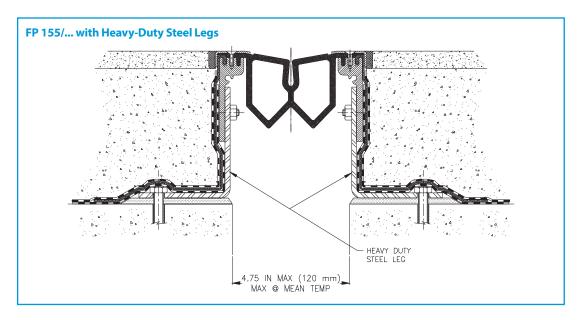

The E-8, by removing the metal anchor bracket present in the E-2 version, eliminates the need to dog-leg around columns, walls, etc., that interrupt continuous runs.

CAD & Guide Specs

Guide Specifications and <u>CAD details</u> are available online at Emseal.com or by <u>contacting Emseal</u>.

Warranty

Standard or project-specific warranties are available from Sika Emseal on request.
