COLOR-MATIC

LIQUID & GRANULAR INTEGRAL COLOR DISPENSERS

Increte Systems state-of-the-art Color-Matic dispensers are integral concrete pigment dispensing systems trusted by industry professionals throughout the world to provide "Color on Demand" to the ready-mix and precast concrete industry. The Color-Matic systems use the latest technologies to produce computerized batching in ready-mix, precast and supply houses and are the most accurate in the industry. Each color dispenser machine offers a solution for every user; from 1 yard to 10 yards using liquid and granular colors. The Color-Matic Systems can produce all Increte's standard integral colors using just 4 primary base colors. Combined with Increte's color matching capability, these systems can also produce all competitive integral colors and are preloaded with close to 1,000 competitive colors from all major brands. Increte Color-Matic Systems integrate internet capabilities for remote access to provide on-line training, troubleshooting and system software updates.

All of Increte Systems Color-Matic Dispensers use PC Control; 120-volt power and air to operate. Some systems require water for mixing and flushing systems between batches.

GRANULAR COLOR SYSTEMS

SUPPLY HOUSES, READY-MIX & PRECAST OPERATIONS

COLOR-MATIC "G"

Color-Matic "G" Systems take color dispensing systems to the next level by using a low-dust granulated color to produce pigments used in supply houses, precast plants and ready-mix plants. Designed for speed and accuracy, the Color-Matic "G" will provide every producer with an economical and efficient way to dispense color.

ColorMatic "G" is our workhorse, available in 3 sizes, all systems are containerized, heated and insulated:

- "G10" - 10 cubic yards
- "G3" - 3 cubic yards
- "G1" - 1 cubic yard.

Increte System's patent pending design uses a set of unique processes to batch color recipes and mix into a slurry before being pumped into the mixer. The system is flushed and cleaned automatically after each batch. Since the color is kept dry until needed, there is no need to recycle the material. The granulated color is sheared in the weighing process to insure 100 percent tint strength is achieved from batch to batch. The system maintains inventory levels and stores a batch record in a database.

COLOR-MATIC "B"

Color-Matic "B" is a granular color dispensing system designed for the supply house to weigh color into a bag or 5 gallon pail. Using a computer, the user can produce all of Increte's standard integral colors along with most competitive colors. A label is automatically printed after each batch to identify every bag or pail. Inventory levels are also maintained within the system.

LIQUID COLOR SYSTEMS

SUPPLY HOUSES & READY-MIX

COLOR-MATIC I

Color-Matic I is a liquid color dispensing system used to batch liquid color into a 3.5 or 5-gallon pails. Simple touch screen operation allows users to easily select the color to be produced. The system weighs the cumulative color into a pail and immediately prints a batch label listing the content details. System pumps are programmed to automatically recycle material to prevent the product from settling when not in use. Inventory levels are updated after every batch, and a database is used to store batch records.

COLOR-MATIC II

Color-Matic II is a liquid color dispensing system with the same features in **Color-Matic I** with the additional option to weigh into a 10-yard mixer. This system also has dual operator interface to allow users to produce batches directly from the batch office into the mixer or from the touch screen computer on the dispenser control panel into a 3.5 gallon or 5-gallon pail. When the color is weighed into a pail, the report label is printed to identify the contents of each batch. All color batches are recorded in a database for future reference and can be printed on the laser printer provided with the system.

SINGLE COLOR SYSTEM

Increte System's Single Color dispenser uses the technology provided with Color-Matic II to weigh a pre-blended liquid pigment that is project specific. Increte's Single Color System will save you time, labor and minimize risk of injury due to carrying heavy bags of color to the mixer.

WHY COLOR-MATIC IS A NOTCH ABOVE THE REST

- **BATCH CONTROL INTERFACE**
 - Granular COLOR-MATIC is compatible with the two most popular ready-mix systems
- **MOST ACCURATE DISPENSING SYSTEM IN THE INDUSTRY**
- **OUR TOUCHSCREENS ARE THE EASIEST TO OPERATE**
- **THERE IS A COLOR-MATIC SYSTEM TO FULFILL EVERY CUSTOMER'S NEEDS**
