INDUSTRY LEADERSHIP

For over 100 years, The Euclid Chemical Company has served as a leading supplier to the concrete and masonry industry offering a full line of engineered concrete admixture and construction products. These products include concrete admixtures, block and masonry additives, fibers, curing and sealing compounds, epoxy adhesives, floor and wall coatings, structural grouts for columns, equipment and machinery, joint fillers and repair products. The Euclid Chemical Company strives to bring innovative technologies and products to the concrete market with industry leading customer service.

CUSTOMER SOLUTIONS

The Euclid Chemical Company is unique in our offering of superior products and unparalleled customer service and industry support. The Euclid team delivers a range of value-added resources and in-depth industry experience to architects, designers, engineers, building contractors and owners. Comprised of highly trained professionals who are available in local offices across the Americas, our experts are active members on industry technical committees including American Concrete Institute (ACI), International Concrete Repair Institute (ICRI) and American Society for Testing and Materials (ASTM). Our experienced field team is available to support you and your projects using Euclid Chemical solutions and products manufactured under the stringent standards of our ISO 9001:2000 certified quality system. The Euclid Chemical Company works hand-in-hand with customers:

- ◆ supplying field evaluations, recommendations and application problem-solving on a project-by-project and technology basis;
- ◆ assisting in product selection, specification, installation and related technology;
- ◆ attending pre-design meetings, assisting in clarifying specifications and recommending product selection;
- ◆ supporting you by providing proper pre-installation instructions and methods for achieving quality results.

LABORATORY SERVICES

Our world class Cement and Concrete Reference Laboratory (CCRL) inspected facilities are equipped with state-of-the-art technologies and staffed by an exceptional team of professional, ACI certified technicians. These outstanding resources provide The Euclid Chemical Company the capability to offer comprehensive analytic and petrographic evaluation and testing services via programs that conform to the standards prescribed by the American Society for Testing and Materials, the U.S. Army Corps of Engineers (USACE), the American Concrete Institute and the International Concrete Repair Institute.

TRAINING

The Euclid Chemical Company generously shares product information and technical knowledge through training and seminars conducted for project owners, contractors, distributors and design professionals. Many programs are AIA/CEU registered, allowing eligible attendees to earn professional development hours. Euclid Chemical is proud to sponsor these opportunities for our associates and colleagues as part of our ongoing commitment to the concrete construction industry.

BUILDING GREEN

At Euclid Chemical, we understand the critical impact that sustainable design and “green” building can have on our world. We also realize that to have a positive influence as a supplier to the construction industry, we must make it part of our company’s vision to provide sustainable product systems that achieve social and environmental objectives while providing economic balance. To that end, Euclid Chemical provides a full line of low-VOC sealers, coatings, and products based on renewable water-based technology, along with grouts and mortars that utilize recycled raw materials. When challenged by clean air regulations or striving to achieve LEED building certification, consider Euclid Chemical your one source for sustainable solutions.
