Re: **UltraGuard™**– LEED™ Product Information

To Whom It May Concern:

Euclid Chemical, as a company, is committed to quality, responsive to internal and external customers, our employees, our community and environment, and we will treat all with respect and good stewardship.

**UltraGuard** can contribute to LEED™ points of a building based on its “low-emitting” qualities, Indoor Environmental Quality (EQ) Credit. This product has a volatile organic compound (VOC) content of **110** g/L (grams per liter.)

**UltraGuard** has been tested for VOC emissions in accordance with CDPH Standard Method V1.2, and is compliant with USGBC LEED Version 4, BD&C, ID&C. Test report is available upon request.

**UltraGuard** is manufactured in **Kirkland, IL**. If **Kirkland, IL** falls within a 500-mile radius of the project site, the product is considered to be a locally produced material and can help contribute to earning (MR) Regional Materials Credit.

No single extracted material is used to produce the majority of this product. Additionally, all raw materials come from one of several sources which in-turn come from one of several raw material feed stocks. As such, point source for the raw materials cannot be determined.

If you have any further questions please contact technical support at 800-321-7628.

Sincerely,

Euclid Chemical Technical Support
