#### Section 4 - First Aid Measures

#### 4.1 Description of first aid measures

Inhalation

 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing.

Skin

 IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse.

Eye

In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.

Ingestion

If swallowed, do NOT induce vomiting unless directed to do so by medical personnel. Get medical attention immediately.

### 4.2 Most important symptoms and effects, both acute and delayed

Refer to Section 11 - Toxicological Information.

### 4.3 Indication of any immediate medical attention and special treatment needed

**Notes to Physician** 

· All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

### Section 5 - Firefighting Measures

### 5.1 Extinguishing media

Suitable Extinguishing Media • CAUTION: For mixtures containing a high percentage of an alcohol or polar solvent,

alcohol-resistant foam may be more effective.

LARGE FIRES: Water spray, fog or alcohol-resistant foam. SMALL FIRES: Dry chemical, CO2, water spray or alcohol-resistant foam.

Unsuitable Extinguishing Media

None known.

#### 5.2 Special hazards arising from the substance or mixture

**Unusual Fire and Explosion Hazards** 

HIGHLY FLAMMABLE: Will be easily ignited by heat, sparks or flames.

Containers may explode when heated.

Vapor explosion hazard indoors, outdoors or in sewers.

Many liquids are lighter than water.

Most vapors are heavier than air. They will spread along ground and collect in low or

confined areas (sewers, basements, tanks).

Runoff to sewer may create fire or explosion hazard.

Vapors may form explosive mixtures with air.

Vapors may travel to source of ignition and flash back. Dried solids can burn and release toxic fumes and vapors.

**Hazardous Combustion Products** 

Carbon dioxide, carbon monoxide, oxides of nitrogen, hydrogen chloride, various hydrocarbons, phenols, acrid smoke and irritating fumes.

#### 5.3 Advice for firefighters

No action shall be taken involving any personal risk or without suitabletraining.

Move containers from fire area if you can do it without risk.

Structural firefighters' protective clothing will only provide limited protection. Wear chemical protective clothing that is specifically recommended by the

manufacturer. It may provide little or no thermal protection.

Wear positive pressure self-contained breathing apparatus (SCBA).

#### Section 6 - Accidental Release Measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

#### **Personal Precautions**

 Ventilate enclosed areas. Wear appropriate protective clothing. Do not touch or walk through spilled material.

#### **Emergency Procedures**

• ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). As an immediate precautionary measure, isolate spill or leak area for at least 50 meters (150 feet) in all directions. If tank, rail car or tank truck is involved in a fire, ISOLATE for 800 meters (1/2 mile) in all directions; also, consider initial evacuation for 800 meters (1/2 mile) in all directions. LARGE SPILL: Consider initial downwind evacuation for at least 300 meters (1000 feet) Keep out of low areas. Stay upwind. Keep unauthorized personnel away. Ventilate closed spaces before entering.

### 6.2 Environmental precautions

Prevent entry into waterways, sewers, basements or confined areas.

#### 6.3 Methods and material for containment and cleaning up

Containment/Clean-up Measures

Stop leak if you can do it without risk.

A vapor suppressing foam may be used to reduce vapors.

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders,

sawdust).

Use clean non-sparking tools to collect absorbed material.

All equipment used when handling the product must be grounded.

#### 6.4 Reference to other sections

 Refer to Section 8 - Exposure Controls/Personal Protection and Section 13 - Disposal Considerations.

### Section 7 - Handling and Storage

### 7.1 Precautions for safe handling

Handling

Keep away from fire. Keep away from heat and sparks. Do not eat, drink or smoke
when using this product. After handling wash hands thoroughly. Prevent formation of
aerosols. All equipment used when handling the product must be grounded. Bond and
ground all transfer containers and equipment. Take precautionary measures against
static charges. Containers, even those that have been emptied, can contain explosive
vapors. Do not cut, drill, grind, weld or perform similar operations near container.

### 7.2 Conditions for safe storage, including any incompatibilities

Storage

 Store in a cool, dry place. Store in a well-ventilated place. Keep container tightly closed. Keep away from fire.

#### 7.3 Specific end use(s)

Refer to Section 1.2 - Relevant identified uses.

#### 8.2 Exposure controls

## **Engineering Measures/Controls**

Good general ventilation should be used. Ventilation rates should be matched to
conditions. If applicable, use process enclosures, local exhaust ventilation, or other
engineering controls to maintain airborne levels below recommended exposure limits.
If exposure limits have not been established, maintain airborne levels to an acceptable
level. Use explosion-proof electrical/ventilating/lighting/equipment.

#### **Personal Protective Equipment**

Respiratory

 In case of insufficient ventilation, wear suitable respiratory equipment. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face

Wear splash goggles.

Skin/Body

• Wear clothing and footwear that cannot be penetrated by chemicals or oil.

General Industrial Hygiene Considerations

 Avoid contact with skin, eyes or clothing. Keep away from food, drink and animal feeding stuffs. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Handle in accordance with good industrial hygiene and safety practice.

**Environmental Exposure Controls** 

 Follow best practice for site management and disposal of waste. Controls should be engineered to prevent release to the environment, including procedures to prevent spills, atmospheric release and release to waterways.
