

Notice of Patent Infringing Design

The following detail is a patent infringement to Fire Trak patents 5,471,805 & 5,755,066.

Using two ceiling runners (or any material) to create an offset at the head of a partition to allow an overlapping piece of wallboard to be attached is a patent infringing design.

Fire Trak Corp. has enforced its patents against infringers and will continue to do so. In this regard though, Fire Trak Corp. does not wish for anyone to innocently infringe. It is certainly more fair and less costly when you and others are aware of Fire Trak intellectual property and can avoid infringing it.

We are doing investigations on current and past projects in your area. If you are aware of the use of this design, please contact us to let us know that you were unaware that the design was an Infringement and you will discontinue its use. Willful infringement of patents can carry the possibility of triple damages and the paying of our attorney fees.

Please contact Brian Becker, CEO, Fire Trak Corp. at 1-800-394-9875 regarding this matter.
