

#### Posi Klips used with Fire Trak Deflection Track and Firestopping System

Posi Klips are only U.L. required for use with the Fire Trak System when the deflection criteria exceeds 2".

Please reference U.L. Listing HW-D-1011 for joints over 2".

#### Posi Klips used with Deep Leg Track

Posi Klips can be used with deep leg track to provide deflection for rated and non-rated walls.

16 and 20 Gauge Posi Klips

**Manufacturer** FIRE TRAK CORP. 12098 County Rd. 150, Kimball, MN 55353  
(800) 394-9875 ph (320) 398-7660 fax info@firetrak.com www.firetrak.com

#### Description

Posi Klips are attached to the inside flange(s) of the ceiling track with two #6 tek screws and engage the short flange of the metal stud.

Posi Klips can be used with any stud or track size or gauge.

Posi Klips are available in 20 & 16 gauge.

#### Applications

Can replace double track or slotted track systems in interior or exterior walls.

Can handle different deflections by varying track depth.

Locks jamb or king studs at frames while allowing deflection.

Reinforces any stud to track connection while allowing deflection.

#### Movement Capabilities:

##### Non- Rated

When used with deep leg track.

##### Rated

When used with deep leg track or Snap Trak in conjunction with fire caulk or spray to achieve rating.

When used with Fire Trak to strengthen stud to track connection on deflections over 2". NO fire caulk or spray necessary to achieve fire rating.

#### Steel Specifications

20 Gauge (.0356 min thickness) galvanized steel, Conforms to ASTM C-645  
Steel Conforms to ASTM A-653, Minimum 33,000 ksi yield strength  
Galvanized in accordance with ASTM A-924, G-40

16 Gauge (.0575 min thickness) galvanized steel, Conforms to ASTM C-645  
Steel Conforms to ASTM A-653, Minimum 50,000 ksi yield strength  
Galvanized in accordance with ASTM A-924, G-60
