

Integrated Functional Reveal

FRYREGLET
ARCHITECTURAL METALS

The Reveal that works...in schools, community buildings, boardrooms and a wide range of other applications

Integrated Functional Reveal

Fry Reglet's Integrated Functional Reveal reveals a lot about Fry Reglet and its innovative thinking—even on the details. Our Integrated Functional Reveal is taped and finished into the wall, and not face-fastened, to provide more aesthetic appeal to any structure. This specially engineered reveal allows the user the option of inserting a small chartrail or hooks on to the surface. When the function is finished, simply remove the chartrail or hooks to return the wall to its original character. The chartrail can be used to hold markers or as a stand for presentations and art work. Hooks can be placed anywhere on the reveal as needed and repositioned for different size objects like artwork, photography or presentations.

Integrated Functional Reveal Rail

Reveal is manufactured from 6063 aluminum and shipped in 10' lengths that may be field modified to extend across the entire wall surface or cut to any length desired. Available Clear Anodized or Chem-Film for field painting.

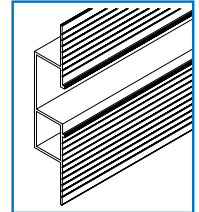

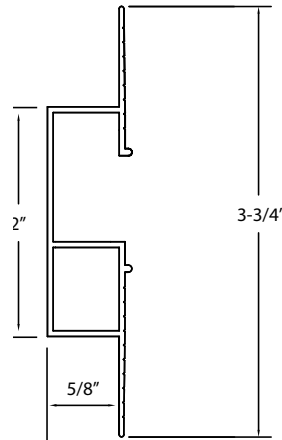

2" Chartrail Insert

Chartrail is manufactured from 6063 aluminum and is shipped in 10' lengths that may be field modified. Built-in rubber gasket protects drywall. Clear Anodized finish.

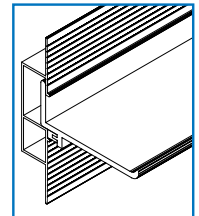

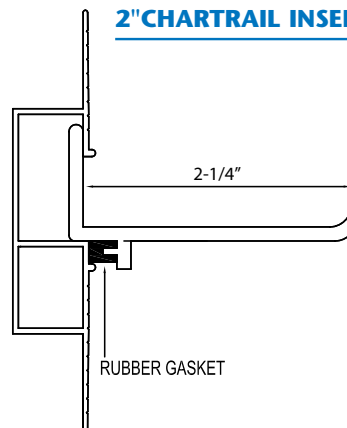

Hook Insert

Hooks are 1" wide, 6063 aluminum. Each hook has a built-in rubber gasket to protect drywall. Clear Anodized finish.
