**Cobra**<sup>®</sup>  
Exhaust Vent for Roof Ridge

Quality You Can  
Trust... From  
North America's  
Largest Roofing  
Manufacturer!™

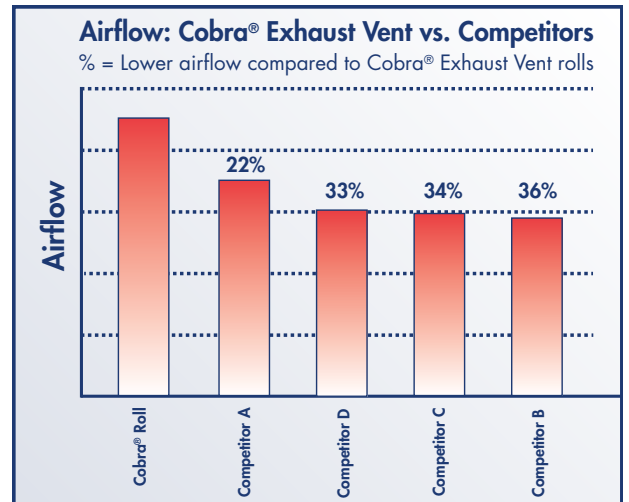

WHOSE VENT

# VENTS BEST?

*“One of North America’s most trusted ridge vent brands is also the best performing compared to the rolled ridge vents of other leading brands!”*

- Cobra<sup>®</sup> Exhaust Vent provides considerably higher airflow than leading competitors’ roll vents
- The leading roll ridge vents were tested by GAF for airflow using the CCMC Attic Pressurization Test Protocol at 10 Pascals\*
- At a low attic pressure of 10 Pascals, leading competitors’ roll vents provided up to 36% **less** airflow than Cobra<sup>®</sup> Exhaust Vent rolls

\* 10 Pascals is very low pressure, realistic to low pressures found in real attics

**“The Real Question You Should Ask Yourself Now Is...SHOULDN’T I BE USING COBRA<sup>®</sup>?!”**
