* Pre-consumer Recycled Content (Post-Industrial) is defined as material diverted from the waste stream during the manufacturing process. Excluded is reutilization of materials such as rework, regrind, or scrap generated in a process and capable of being reclaimed within the same process that generated it.

** Post-consumer Recycled Content is defined as waste material generated by household or by commercial, industrial, and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. This includes returns of materials from the distribution chain.

We protect what matters most™
