SECTION 4: FIRST AID MEASURES

FIRST AID PROCEDURES

EYES: Flush with warm water for 15 minutes and seek immediate medical attention.

SKIN: Wash with soap and water for 15 minutes. If irritation persists, seek medical attention.

INHALATION: Move victim to fresh air. If breathing has stopped, give artificial respiration. Seek immediate medical attention.

INGESTION: Do not induce vomiting. Get medical attention and advise the physician of the nature of the material.

NOTES TO PHYSICIANS OR FIRST AID PROVIDERS: Target organ is the Central Nervous System (CNS). Asthma-like conditions may occur.

SECTION 5: FIRE FIGHTING PROCEDURES

SUITABLE EXTINGUISHING MEDIA: Foam, dry chemical, carbon dioxide, water spray or fog.

HAZARDOUS COMBUSTION PRODUCTS: Carbon dioxide, carbon monoxide, chlorine compounds, fluoride compounds and hydrocarbons.

RECOMMENDED FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus with pressure-demand, full face piece SCBA and full protective gear.

**UNUSUAL FIRE & EXPLOSION
HAZARDS:**

Extremely flammable. Vapors may ignite and/or cause flash fires. No smoking. Eliminate sources of ignition. Avoid fire, sparks, static electricity and hot surfaces. Liquid readily evaporates at room/ambient temperature. Vapors are invisible, flammable, and heavier than air, and may accumulate in low areas and spread long distances. Distant ignition and flashback are possible. Likely to catch fire from near-by spark. Static charge may accumulate by flow or agitation. Grounding and bonding of containers is required.

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES:

Keep unnecessary people away; isolate hazard area and deny entry. Stay upwind, out of low areas, and ventilate closed spaces before entering. Eliminate all ignition sources (flames, hot surfaces and sources of electrical, static or frictional sparks). Dike and contain spill with inert material (e.g. sand, earth). Transfer liquids to covered metal containers for recovery or disposal, or remove with inert absorbent. Use only non-sparking tools. Place absorbent diking materials in covered metal containers for disposal. Prevent contamination of sewers, streams and groundwater with spilled material or used absorbent.

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE:

Keep container closed when not in use. Store in a cool dry place and away from ignition sources and elevated temperatures. Store away from strong oxidizers. Use adequate ventilation to avoid breathing vapors when cover is removed.

OTHER PRECAUTIONS:

For professional or industrial use only. Follow label instructions. Keep out of the reach of children. Not for consumption. No smoking. Do not breathe fumes. Avoid contact with body. Turn off all pilot lights, flames, stoves, heaters, electric motors, welding equipment and other sources of ignition. Close all containers when not in use. Contact lens wearers take appropriate precautions. Wash hands thoroughly after handling. For flammable products, vapors may cause flash fire or ignite explosively. To prevent buildup of vapors, use adequate ventilations (e.g. open all windows and doors to achieve cross-ventilation). Containers may be hazardous when empty. Never use welding or cutting torch on or near container. Do not cut, drill, grind, or expose containers to heat, sparks, static electricity or other source of ignition.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS / VENTILATION:	Provide sufficient explosion proof mechanical ventilation to prevent exceeding recommended exposure limits or build up of explosive concentrations of vapor in air.
RESPIRATORY PROTECTION:	If personal exposure concentrations cannot be maintained below the appropriate exposure limits using engineering controls, a NIOSH/MSHA approved organic vapor air purifying respirator may be appropriate based on employer-determined exposure levels. Air supplied or SCBA respirators may be required when the measured chemical concentration exceeds the capacity of the air purifying respirator or when personal exposure levels are unknown.
EYE PROTECTION:	Wear safety glasses with side shields or chemical goggles; face shield if there is a potential for splashing.
SKIN PROTECTION:	Wear chemical resistant gloves when handling this product to avoid prolonged skin contact.
OTHER PROTECTIVE EQUIPMENT:	Various application methods can dictate the use of additional protective safety equipment such as chemical resistant boots, impermeable aprons, etc. when handling this product to avoid prolonged skin contact.
WORK HYGIENIC PRACTICES:	Wash exposed skin prior to eating, drinking or smoking and at the end of each shift. Wash contaminated clothing prior to reuse. A source of clean water should be available to flush eyes and skin.
