EXPLORING SHINGLE STYLES

& COLORS WITH NANCY FIRE

Nancy Fire, the design director for HGTV HOME, has defined an exciting trend — taking the Inside Out.

Nancy states, “As homeowners spend more time outside of their homes, they want to extend their interior style and sensibility — whether that be elegant, traditional, or more contemporary — to their outdoor living spaces that include the yard, the deck, and the roof.

“Your roof is a decision with a long-term impact. So make shingle, roofing style, and color choices that will complement your home and your personal style, providing you with years of comfort and satisfaction.”

The color and style of your shingle are important! They go hand in hand when considering what shingle to use on your roof. After all, your roof represents up to 40% of your home's curb appeal, so it will always have a big impact on your home's overall look.

Choosing colors for your home's exterior is fun and exciting — and it's also a very significant decision. Remember, the color palette you select won't change with the seasons; it's going to be part of your home for the long term. So whether you like bolder colors that make a statement or you prefer more subtle, softer tones, you want to be sure that the palette you choose today is one that you'll still enjoy on your home years from now.

- Consider how much of your roof is visible from the street. Many times, larger roofs look more inviting using neutral tones while smaller roofs can be a bit more colorful, with more unique patterns.
- For a more traditional color palette, use tones of a color to incorporate a more subdued style into the exterior of your home. A neutral roof color creates the perfect backdrop for other colors.

- For a more contemporary design statement, try bringing attention to the top of your home (such as, using a red roof on a gray house) while coordinating trees and shrubs in the yard that will extend your roof color to your outdoor space (in this instance, like the Red Leaf Maple).

When it comes to choosing the style of your roof shingle, there's no such thing as right and wrong — there's only what works best for you and for your home. Certain elements, such as the size and pitch of your roof, can help determine what shingle style will better complement your home's exterior. Today, there are many types of shingle profiles and patterns available to help you differentiate your roof. Decide the statement you want to make, and embrace it!

- Color and texture add dimension to any home. In choosing your exterior shingle style, remember the importance of curb appeal in making these choices.

- The architectural style of your home is a key component when choosing a shingle style. A Colonial house, for example, might look best with a shingle that features a cleaner, more defined line, while a Victorian home could use a shingle with a more intense hue or a more elaborate and detailed design.

- A large roof surface is much like a blank canvas, giving you almost limitless possibilities for making a dramatic change in the look of your home's exterior. But smaller roofs or roofs with more variations in pitch also offer great opportunities, allowing the incorporation of more unique designs or patterns.

Above all, choose the shingle color and shingle style that make you feel the most comfortable. It's your home, your personality, your lifestyle. The final decision should reflect that — and do so beautifully!
