

Foundation Ventilation

Foundation Vents

Master Flow® Foundation Vents help to remove damaging moisture, which can lead to mold growth and structural decay in the foundation area of the home. They can even help lower the risk of frozen pipes by providing ventilation in the crawl space area.

Power Foundation Vent

PFV1

- Removes damaging moisture – helps prevent structural decay and mold growth
- Fits in traditional foundation vent openings, with simple plug-and-go operation
- Powered operation helps to reduce increased volumes of moisture during peak times

Automatic Foundation Vent

FVRABL

- Automatically opens at 70°F, closes at 40°F
- Helps prevent foundation decay
- Lowers risk of frozen pipes
- Replaces manual vent
- Snap-in installation

Grate Style 500

- Positive open/close damper action
- Lintel for foundation block construction
- Lowers risk of frozen pipes
- Helps prevent foundation decay

Block Style BVSII

- Aluminum vanes; lintel not required
- For block, brick, or frame construction
- Recommended for high-level ventilation

Plastic Slider PS168BL

- Plastic vent with slider and lintel
- Manual open and close
- For brick or block construction

Plastic Replacement PNM168BL & PNM168BR

- Perfect for replacing old foundation vents
- Simple to install with included screws
- No mortar required
- Push/pull damper for easy open and close

Grill Style LW1/LW1L

- Designed for nailing to floor joists or as a foundation block replacement

Cover FVC168

- Easy to mount over most 16" x 8" foundation vents
