

# **MINERAL SHIELD**<sup>™</sup> ROOFING GRANULES

### Description

Mineral Shield<sup>™</sup> Roofing Granules are used as an aesthetic treatment of end laps and side laps on granule-surfaced built-up and modified bitumen membranes. Mineral Shield<sup>™</sup> Roofing Granules are loose granules used for detailing and general roof repairs. The granules are weather resistant and designed to meet industry and code requirements.

### **Basic Uses**

Suitable for use on heat-fused membranes or with systems installed in cold adhesive or hot asphalt. Broadcasting granules into asphaltic flow helps prevent premature aging of the compound and creates a seamless appearance of the membrane surface.

#### **Advantages**

- Mineral Shield<sup>™</sup> Roofing Granules provide a multi-faceted design and light-reflective construction that adds dimension and depth to membrane products.
- UV blocker protects against damaging sunlight, improving durability of the membranes and the system.
- Color Lock<sup>™</sup> Ceramic Firing maintains the true color of the granules longer.

Product Specifications (nominal)	
Specific Gravity	250–265
Bulk Density–Loose in Ib/ft <sup>3</sup>	81–87
Moisture	<0.2%
Base Rock Hardness Barrett	86–97
Mohs	6–7

## **Applicable Standards**

- ASTM D451
- ASTM D452

**Product Data** (Approximate) 5-gallon pails

Colors vary by region:

• White, Tan, and Black
