

It's more than a coating. It's lasting pavement protection.

An epoxy-modified acrylic coating, DuraShield extends the time between recoats, dries fast and hard, is low VOC, and comes in an optional solar reflective formula that helps “cool” the asphalt.

Best of all, DuraShield Performance Coating is eligible for the GAF Pavement Pledge 5-Year Limited Warranty when installed according to specifications by a qualifying applicator.*

Increase the protection — reduce the hassle

As a two-part epoxy-modified acrylic coating, DuraShield is formulated to protect the substrate against weather elements, cracking and wear.

DuraShield also:

- Can extend the time between recoats
- Dries fast, so it's traffic-ready in hours, helping you return your parking lot to service quickly
- Dries hard, which helps protect your floors, carpets, vehicles, and crosswalks from the sticky black asphalt tracks that can accompany traditional asphalt-based sealcoats
- Includes an aggregate that helps prevent surface slickness
- Is low-VOC, with none of the unpleasant odors common with asphalt and tar

DuraShield Solar Gray: The "cool" pavement alternative

Exposing asphalt to heat and UV (i.e. sunlight) can lead to stiffening, thermal expansion, contraction, water infiltration, and ultimately potholes, maintenance calls, and safety issues. And if you have a lighter-color asphalt surface, adding a black asphalt sealcoat can make the problem worse.

Fortunately, DuraShield is available in Solar Gray, with an SR of .34, which meets LEED V4 requirements for solar reflectivity.

By keeping the asphalt cooler, DuraShield in Solar Gray can help:

- Extend the life of the asphalt
- Mitigate the Urban Heat Island effect
- Create a more comfortable walking surface for employees, customers, and pets

Available 5-Year Pavement Pledge Limited Warranty for eligible installations

A 5-Year Pavement Pledge Limited Warranty is available when DuraShield is installed according to specifications by a qualifying applicator.* The 5-Year Pavement Pledge includes a customized coating maintenance plan, created with you by a GAF coating consultant, designed to help maintain the aesthetics of your parking lot.
