

Vibrant Granule Reflectivity

Innovative granule technology has changed everything! New EcoDark™ granules produce vibrant color never before seen in a cool roof.

EcoDark™ Granule Technology

The Challenge:

Before now, if you wanted a highly reflective dark-colored roof that met the prescriptive requirements of Title 24, you would have had to settle — for choices were limited to largely pastel colors. Dark, vibrant colors did not exist, and other colors — like barkwood and weathered wood — were a pale facsimile of their traditional counterparts.

But now, innovative granule technology has changed everything! GAF EcoDark™ granules produce vibrant color never before seen in a cool roof.

You can finally have the rich, vibrant colors you've always wanted in a highly reflective shingle, including Charcoal.

Benefits:

- California COOL™ Shingles meet the prescriptive solar reflectance and thermal emittance requirements according to the 2016 Title 24 Standards, are rated by the Cool Roof Rating Council, and meet the cool roof requirements of the Los Angeles Green Building Code
- Cool roofs may help you save on cooling costs¹

California COOL™ Shingles Product Info

Shingle line	Shingle color	Initial reflectivity	Initial emissivity	Aged reflectivity	Aged SRI	CRRC product ID#
Glenwood®	Golden Prairie	0.17	0.92	0.18**	17	0676-0103
	Charcoal	0.18	0.92	0.19**	19	0676-0143
	Ocean Gray	0.19	0.92	0.19**	19	0676-0142
Grand Sequoia® Reflector Series™	Forest Brown	0.19	0.92	0.19**	19	0676-0140
